- Identification of defects, registering them in JIRA and reporting them to the onsite lead.
- Identified End to End Test Scenarios, Test Cases and Test Data.
- Participate in Scrum meeting to discuss about project progress report every day.
- Identify the test cases for Automation. Design POM Classes and Test Classes.
- Responsible for testing deliverables, prioritize and monitor activities to meet such dates for individual assigned features.
- Validate Expected output vs Actual output in respective database tables Using SQL. Validate Expected output vs Actual Output in respective logs files using UNIX.

## **Projects**

### **Project 1: Insurance Domain**

**Feb 2022 - April 2023**

#### **Customer Engagement Desktop Enablement**

- Application name is RTB (Real time benefits), It is a BPO application which provides support to the members and the Providers.
- In many cases customers/members don't know about what all benefits are included in their policy so in that case they can connect to the customer advocate i.e., RTB and resolve their queries.
- Ex. If any member wants to know about Ambulance related facilities, blood test related facilities or Allergy Testing etc. related facilities are included in their policy or not so they can know through RTB.
- If any member doesn't know about how much deductibles, copay etc. or in simple how much money they have to pay for in-network and out-of-network provider facilities those things they can know through RTB.
- Same goes for the provider, they can collect the information on the behalf of members so in future insurance claims will not get rejected and they will not face any problems.

### **Project 2: Investment Banking**

**June 2019 - Feb 2022**

#### **XM**

- Touted as the next generation broker for online forex and commodity trading, XM Global Web trade is suitable for beginner and seasoned traders alike.
- Traders can get started with the trading software real account, or test the waters with a demo account platform with \$100,000USD of virtual currency.
- Highlights of this particular broker service include auto trading, no hidden fees or commissions and fast order executions, with 99.35% taking place in under 1 second.
- XM offers 2 trading platforms which are accessible from both real and demo accounts.
- The multi-award-winning Meta Trader 4 is predominantly a forex trading platform that supports stop, limit, market and trailing orders.
- The Meta Trader 5 platform is a multi-asset trading platform which also offers access to stocks, stock indices and precious metals. Both platforms are available on Apple and Android devices, which makes for a smooth and easy-to-use mobile trading experience.
