

I'm a well experience Integration Engineer with 7 years of experience in Mulesoft and 1 Year of experience in SAP CPI. Looking to land in a job where I can use my skills to provide integration solutions.

Summary

- Experience in building flows using API Led Connectivity in Mulesoft
- Experience in working with various connectors like HTTP, DB, SFTP, Salesforce, VM etc.,
- Experience in working with various components like Transform, Scatter gather, Async, For-each, Parallel for each etc.,
- Experience in working with SOAP and REST protocols
- Experience in gathering requirements from clients, assigning tasks to team and delivering them on time
- Experience in building end to end flows, from RAML to Deployment in Cloudhub and On premise systems
- Experience in Anypoint platform to create Documentation, apply policies, analyze the logs etc.,
- Experience in SAP CPI in building Iflows
- Experience in building B2B scenarios in SAP CPI using Standard TPM offered by SAP
- Experience in Designing B2B Scenarios. Can Create Company profile, TPP, TPA in SAP CPI
- Experience in using standard functions to apply required logics in SAP CPI
- Experience in Context handling in Sap CPI. Can write groovy scripts

Technical Knowledge

- Mulesoft 3 and 4
- SAP CPI
- Groovy Scripting
- SQL

Work Experience

Company: Accenture

Project Title: Unilever

Duration: July 2023 to till present

Currently Accenture is migrating Unilever's interfaces from Boomi, Mulesoft, PIPO to SAP CPI. The current project Im working now is migration from Boomi to SAP CPI

Responsibilities:

- Modified the standard TPM flow provided by SAP CPI to meet our requirements
- Analyzed the Boomi code and created multiple iflows in SAP CPI
- Trained resources on standard functions available in SAP CPI to implement various logics used in Boomi
- Lead a team of 12 resources, assigned the tasks to them, solved the queries and got it promoted to QA
- Got the defects raised by testing team fixed, and if everything is fine, promoted the code to Prod as per timelines
- Organized multiple sessions with various teams to explain the architecture
- Constantly in touch with Clients to understand the expectations and get it delivered

Company: Accenture

Project Title: Hawaiian Telcom

Duration: Mar 2022 to July 2023

Accenture has undertaken the migration of interfaces from Tibco to Mulesoft

Responsibilities:

- Lead a team of 8 resources
- Trained the freshers in Mule and got them to speed in a short time
- Regularly in contact with Tibco team to understand the requirements and got them created in Mule using API Led connectivity
- Developed multiple re-usable assets which were used by developers across teams to deliver quickly

Company: Accenture

Project Title: T-Mobile

Duration: Apr 2019 to Mar 2022

T-Mobile(Sprint then) uses a chatbot where customers can access plethora of functionalities like finding a store, paying the bills, changing the plan, buying a phone etc., I Have joined this project as a senior developer and was promoted to Team lead in this project

Responsibilities:

- Trained the freshers in Mule and got them to speed in a short time
- Analyzed requirements, implemented multiple flows, merged them in Git hub repository and deployed them using Jenkins
- Developed multiple tools to reduce manual effort in project

Company: Tata Consultancy Services

Project Title: Farmers Insurance

Duration: Apr 2017 to Apr 2019

TCS handled the integration task between Guidewire policy systems to the backend systems using Mulesoft

Responsibilities:

- Analyzed requirements, implemented multiple flows, merged them in Git hub repository and deployed them using Jenkins
- Created TDDs for the interfaces created

Company: Tata Consultancy Services

Project Title: Farmers Insurance

Duration: Sep 2015 to Apr 2017

I was part of testing team during this time

Responsibilities:

- Created test cases by referring to requirement documents
- Used HP ALM to raise Defects

Academic Qualification

Bachelor of Technology in Electronics and Communications Engineering in 2015 from Bapatla Engineering College, Bapatla, Andhra Pradesh.

Certificates

- MCIA
- MCD Level 1
- AWS Practitioner
- Salesforce Data Cloud Consultant

Accomplishments

- Received client's appreciation for designing and contributing to the project which I have worked on.
- Consistently recognized with outstanding feedback with annual performance, appraisals and got early promotion.
- Awarded multiple recognitions like 'High Tech Learning Superstars', 'Apex individual Award', 'Star of the week', 'Star of the month' etc.,
- Became a dependable resource in all the projects I've worked, within a month or two.
