**Professional Summary**

I have around 4 years of experience in the IT industry. Has vast experience in multiple domains that include Manufacturing, Digital, Financial and Telecommunication domains.

- Have good experience in working on various customizations in SailPoint.
- Worked on on boarding various applications using different connector types like Flat File (Delimited File) Connector, LDAP, Active Directory-Direct, JDBC, and Okta Connectors.
- Troubleshooting and resolving access management and provisioning workflow errors.
- Perform identity and access management activities.
- Updating existing access management and provisioning workflows.
- Creation and managing service accounts.
- Share folders: share folder creation, security groups and adding/removing users to shared paths, quota change, renaming folders and home folder creation.
- Web access management (IAM, Oracle access manager, and Net access manager).
- Ticketing tools: SDM tool, SailPoint (myrequest) tool, ServiceNow.
- Manage password configuration using SailPoint Password Manager.
- Configure roles, entitlements, and certifications for identity governance and compliance.
- Perform bulk onboarding of roles and entitlements.
- Perform bulk user provisioning and de-provisioning.
- Investigate and fix issues with account provisioning and identity lifecycles.
- Manage service account access and provisioning.
- Analyse, investigate, and escalate account provisioning issues.
- Resolve user-reported issues within SLA using SailPoint IQ.
- Work on auto-provisioning failure requests in SailPoint IQ.
- Perform daily health checks by monitoring servers and tasks.
- worked on creating roles by using business and birthright roles for target applications.
- Experience in working with account correlation and correlation rules.
- Executing and scheduling tasks for aggregation and refreshing identities simultaneously.
- Experience in creating email templates.
- worked on target mappings for synchronizing the attributes.
- Experience in different provisioning types like birthright provisioning and role-based provisioning.
- Configured quick links based on various requirements.
- Modified/updated existing workflows to enable features such as reminder/escalation emails.
- Experience in generating OOTB reports like activity reports, access reviews, and certification reports.

**Education Qualification**

B.Tech from Nova Institute of Technology.

Experience		
Organization	Designation	Duration
Wipro	Sail Point Identity Specialist	Jun 2020 to May 2024
Technical Skills		
Identity Management	SailPoint IIQ 6.3, 6.4, 7.0, 7.1, 7.2, 7.3, 8.0 and 8.1.	
Directory Services	Active Directory	
Databases	Oracle Database, My SQL	
Application Servers & Web Servers	Apache Tomcat	
Operating System Platforms	Oracle Linux , Windows Server	
Programming Languages	Core Java	
Ticketing Tool	Service Now	
Projects Profile		

1	<b>Project Name</b> : Migration from one IAM platform to another	
<b>Client</b>	Leading Online Payment Company	
<b>Role</b>	Team Member	
<b>Organization</b>	Wipro, India	
<b>Duration</b>	06/2020 – 02/2023	
<b>Team Size</b>	<b>Project : 6</b>	<b>Module : Multiple</b>

#### Project Description

Organization is migrating their backend IAM platform to Sailpoint IIQ. Users have been provided with a UI through which they request access, reset password, perform administrative functionalities to achieve business objective. At backend, IAM platform works to perform these business objective. Plan of organization is to migrate one module at a time to IIQ such that both old and new IAM platform(IIQ) work simultaneously for some time at backend of the UI layer. Once all the modules are migrated old IAM platform would be decommissioned.

#### Contribution

As a team member, was responsible for

- Setting up the IIQ instances for proper migration of existing functionalities.
- Doing POCs to achieve custom functionalities.
- Understanding current on-boarded target application on old IAM platform and migrating them to IIQ.
- Implementation of Certification module for Manager and Event Based Certification.

- Enhance email templates and email contents to put it in a descriptive way.
- Integration of custom and OOTB applications with SailPoint IIQ.
- Custom reports for data extraction from non-integrated application.
- Troubleshooting issues faced during instance setup and while implementing the new functionalities.

2	<b>Project Name</b> : SailPoint User Provisioning & Certification Implementation Project	
<b>Client</b>	Leading Telecom Company	
<b>Role</b>	Individual Contributor	
<b>Organization</b>	Wipro, India	
<b>Duration</b>	03/2023 – till date	
<b>Team Size</b>	<b>Project : 8</b>	<b>Module : 8</b>

### **Project Description**

Organization is deploying the SailPoint Identity IQ (IIQ) tool as part of the Identity Management (IDM) project in order to satisfy multiple business objectives in relation to access control. Project implementation intends to enhance identity management and identity governance in organization thereby streamlining user on-boarding, application onboarding, role provisioning and access right review.

### **Contribution**

As a team member, was responsible for

- Installation, configuration and patching of IIQ in Dev, QA and Production environments.
- On boarding of identities via feed files through Authoritative HRMS system. Configuration and setup of the authoritative source – setting up the source attributes in IIQ, defining correlation rules and manager correlation rules.
- Configure the identity mappings to be used post authoritative aggregation and creating custom identity attributes in IIQ.
- Development of custom build map rules for implementing new functionality: create build map rule to check that any identity created should have unique email address across the IIQ database. For this build map rule was created in the authoritative source setup.
- Creation and Modification in LCM workflows to cater the requests from ticketing tool in a better and efficient way. Error handling in workflows. Customization and configuration of the joiner, mover, leaver and rehire business processes in IIQ.
- Build and Configure IIQ in-built tasks like run of aggregation for different target systems, Refresh Identity Cubes, Identity Prune task, target source correlation, custom task for Rule Run, custom task for sequential execution of already defined tasks.
- Finding the orphan accounts for target applications and fixing the orphan accounts.
- End to end configuration and setup of applications like LDAP, Active Directory, HR Feeds(flat Files) etc. This includes the creation of provisioning policies (create, update and delete rules).
- Configuration of roles, policies and certification in IIQ.
- Custom and OOTB reports for data extraction.
- Creating custom Provisioning and Aggregation rules.
