OBJECTIVE

To seek a collaborative environment that encourages continuous learning and creates exposure to new ideas which leading to company's growth as wells as simulating professional growth.

PROFESSIONAL SUMMARY

- Having around 4 Years of IT experience and technical proficiency in Core Java, Collection, Multithreading and Advanced Java.
- Experience in developing backend web application development using Spring Boot.
- Strong commitment, dedication and planning towards goal-oriented tasks.
- Excellent team player with good knowledge of Java development and tools.
- Experience in handling Incidents and bug fixing.
- Flexible and versatile to adapt to any new environment and work on any project.
- Strongly initiative, creative good team player and able to learn new technologies quickly.

WORK EXPERIENCE

- Working as a Software Engineer in **BigPerl solutions Pvt. Ltd** Bangalore from February 2020 to till Date.

QUALIFICATION

- Master of Technology in Power Systems from Jawaharlal Nehru Technological University, Kakinada(2018)
- Bachelor of Technology in Electrical Engineering from Jawaharlal Nehru Technological University, Hyderabad.
- Intermediate, Kakatiya Junior college, Nizamabad.
- SSC, A.H.V High school, Nizamabad.

SOFTWARE PROFICIENCY

- Operating System : Windows 10
- IDE Tools : Eclipse, IntelliJ
- Frameworks : Spring Boot with Microservices.
- Database : MySQL.
- Servers : Tomcat.
- Tools : Postman, Maven, Jira Tool, Git etc.

Project Name : Restaurant Management System	
Client	Little caesars, Panda Express
Role	Backend Java
Duration	March 2023 to till date.
Environment	Java, Spring boot, Rest, My SQL, Maven.

Project Description:

Restaurant management system is a solution which helps restaurant chains with multiple merchants to be managed under a control of a single administration. In the back office application the merchants can be configured with working employees and available items, bill payments can be tracked, customer information can be saved. The employees can login to Android app at start of their shift and create bills for customer with items of their choice. The reports of transaction details can be retrieved from back office application with provided duration.

This project has been developed using the XML, Java at Front End and Spring boot & My SQL Server at Back End.

Roles & Responsibilities:

- Involved in frontend android development using Java.
- Involved in backend development using microservices in spring boot.
- Responsible for rolling out new features, fixing bugs and looking into issues.
- Responsible for writing good code with atmost quality.
- Responsible for ensuring quality on peer's code changes.
- Implemented comprehensive JUnit tests and utilized Jacoco for code coverage analysis to ensure the reliability and quality of the software.
- Worked on Agile projects using JIRA resulting in efficient project management.
- Extensively used Postman tool to perform backend development testing.

Project Name : Digital E-KYC	
Client	DaVita Healthcare
Role	Java Developer
Duration	August 2022 – Mar 2023
Environment	Java, Spring boot, Rest, Junit, Jacoco, Git My SQL &Maven.

Project Description:

E-KYC application is used to update customer's EKYC details based on their risk levels. This application reduces the lot of work for business users and improves TAT. We have developed web services and schedulers which will be integrated with BPM to update the customers KYC details.

Roles & Responsibilities:

- Designed and implemented web services to capture and process customer EKYC data efficiently.
- Created schedulers to automate the updating of customer KYC details.
- Integrated the application with BPM (Business Process Management) for seamless KYC updates.
- Implemented comprehensive JUnit tests and utilized Jacoco for code coverage analysis to ensure the reliability and quality of the software.

Project Name : Credit Card Management	
Client	ABSA Bank
Role	Java Developer
Duration	November 2021 – August 2022
Environment	Java, Spring boot, Rest, My SQL, Maven & Git.

Project Description:

The project is developed for a South African bank. I have developer some features like pin reset, pin display and cvv display of credit card, where end user can check their pin, cvv and also reset their pin. Apart from these features I also developed bill payment, Mobile wallet, fund transfers using credit card features.

Roles & Responsibilities:

- Developed the feature as per client requirements.
- Responsible for rolling out new features, fixing bugs and looking into issues.
- Implemented comprehensive JUnit tests and utilized Jacoco for code coverage analysis to ensure the reliability and quality of the software.
- Worked on Agile projects using JIRA resulting in efficient project management.

- Extensively used Postman tool to perform development testing.

Project Name : Owner Associations (OA)	
Client	Dubai Merchants Association.
Role	Java Developer
Duration	January 2021 – October 2021
Environment	Java, Spring boot, Spring JDBC, Rest, My SQL, Maven & Git.

Project Description

Owner's Association is a payment processing application. It is having integration with Mollak system (Dubai government) to authorize the payment. OA will get payments request from users and it will process according to business rules.

Roles & Responsibilities:

- Developed robust backend services facilitating smooth data processing, retrieval, and seamless consumption of external APIs.
- Implemented comprehensive JUnit tests and utilized JaCoCo for code coverage analysis to ensure the reliability and quality of the software.

Project Name : Employee Management System	
Client	Mesa Laboratories
Role	Java Developer
Duration	April 2020 to Dec 2020
Environment	Java, Spring boot, Rest, My SQL, Maven.

Project Description:

Employee Management System Project is designed to keep track of employee information in any company. It stores data such as their employees' personal information, leave details and salary details.

It gives managers a better idea of their employees and helps them plan and manage their work hours to cut costs and boost productivity. It also secures and manages information that are important to the employees including personal and work-related information. It has advantages of managing and tracking data efficiently than in the manual system.

This project has been developed using the HTML, CSS & JavaScript at Front End and Java, Spring boot & My SQL Server at Back End.

Roles & Responsibilities:

- Involved in backend development using microservices in spring boot.
- Responsible for rolling out new features, fixing bugs and looking into issues.
- Responsible for writing good code with utmost quality.
- Responsible for ensuring quality on peer's code changes.
- Worked on Agile projects using JIRA resulting in efficient project management.
- Extensively used Postman tool to perform development testing.

Candidates Details		
Candidate Name	Abhishek jain	
Date of Birth (DoB)	03-03-1992	
Vendor Name	SAN Engineering	
Applicant ID		
Phone Number	7981351286	
Email Address	abhishekjain10991@gmail.com	
LinkedIn ID		
Current Location (City & State)	Hyderabad	
Relocation	(Yes)	
Preferred Location	Hyderabad	
Current Employer	BigPerl solutions Pvt. Ltd	
Communication / Soft Skills	Good / Excellent / Average / Poor	
Education & Certification Details		
Bachelors (Specialization)	NA	
Masters (Specialization)	University - year - % / GPA	
Certification	if Any	
Experience Breakdown – Years		
Total Experience	4 years	
Relevant Experience	4 years	
EX TechM Employee	Yes / No.. If YES [Duration (Month / year) / N, Role-NA	
Technology Skill Rating		
Skills	Years of Exp	Self Rating 1-10
java	04 years	8/10
J2ee	04 years	7/10
springboot	04 years	7/10
Microservices	04 years	7/10
sql	03 years	6/10
	00 years	
	00 years	
Additional Details		
Notice Period / Available to join	serving	
Reason for change	Better growth	
Put Down Papers	Y / N if Yes (Last working date - 15-april-2024)	
Work from Office	Yes	
Interview Availability	Take tentative/specific time slots Weekdays/Weekend	
Offers in hand	NA	
Any Other information	Any notes
