TECHNICAL SKILLS

Languages	C#, SQL, ASP.NET MVC, Azure Logic Apps, Azure Function and Power BI
IDE	Microsoft Visual Studio 2017 Enterprise Edition
Tool	Power BI
Version Control Tool	Azure DevOps
	Azure
Operating Systems	Windows 10
Database	MS SQL Server

WORK EXPERIENCE

Client 1: **Atal Jyoti Yojana (June 2017 – Feb 2019)**

Organization: Eon Electric Limited
Team Size: 7
Technologies used: Excel VBA, SQL

Description:

Atal Jyoti Yojana was government project, where we were assigned to install 2000 solar LED streetlights in each constituency of Uttar Pradesh, India. I was responsible for collecting all the site related data and raw materials, and store them in structured format i.e., SQL database. Also, I have been working as a VBA developer, used to support user defined applications based on excel VBA.

Roles & Responsibilities:

- Collect data incoming from different sites in the U.P. and store them in an SQL database.
- Maintain and query the data as per business requirement.
- Support user defined applications, created for automation, based on Excel VBA.

Client 2: **MIPI Transformation - AO (March 2019 – Aug 2021)**

Organization: **Accenture**

Team Size: **7**

Technologies used: **ASP.NET MVC, Azure, Visual Studio, VSTS/TFS, SQL**

Description:

MIPI stands for Market Information Provision Initiative, owned by National Grid which provides Gas energy to different regions of UK. Our team supports the maintenance of web applications of client which shows data like gas consumption by customer. This maintenance activity involves technologies like Azure and ASP.NET MVC.

Roles & Responsibilities:

- **Preparation of SQL Scripts** for updating or for any changes to be Deployed.
- Actively participating in Database updating and Code Optimization at lower environment
- **Analyze the exceptions, site usage metrics.**
- R & D activities like Setting up alert system to monitor a queue.

Client 3: **M&G (Sept 2021 -March 2023)**

Organization: **Accenture**

Team Size: **8**

Technologies used: **Azure functions, Azure Data Factory, Azure Logic apps, Power Bi, VBA, .Net core and SQL.**

Description:

M&G is an asset management company which deals in the financial domain. Its headquarters is in London, UK. Basically, M&G manages the assets and trades done by their user. All the trade related data are stored in Azurecloud and fetched through a user defined application. They also used Power Bi reports to represent data to their users for their analysis.

Roles & Responsibilities:

- **Preparation of SQL Scripts** to update and fetch any data as per requirement.
- **Data Cleaning, Loading, Transforming and Visualizing data over dashboard.**
- **Developing New features in applications** as per requirement
- Handling **End to End User Requirements**
- **Create, Design and Modify Power Bi reports** as per requirement.
- **Debug the logic and function apps** to resolve any issues.
- **Deploy all the Changes on Dev and test environments** through Azure DevOps pipelines.

Client 4: **BNYM (March 2023 – till date)**

Organization: **EY**
Team Size: **8**
Technologies used: **.Net core and SQL.**

Description:

In this project, I have been assigned with migration tasks where I need to migrate .net framework 3.0 to .net 6.0 without changing the business logic. Also, I need to update some database values as per new business records.

Roles & Responsibilities:

- **Preparation of SQL Scripts** to update and fetch any data as per requirement.
- **Debugging and Writing C# code in .Net 6 framework**
- **Developing New features in applications** as per requirement
- Handling **End to End User Requirements**
- **Deploy all the Changes on Dev and test environments** through CI & CD pipelines.

CERTIFICATION AND AWARDS

- **Microsoft Azure Fundamentals AZ 900**
- **Honored with Accenture Excellence Award**

EDUCATIONAL QUALIFICATION

Qualification	Score	Passed Year
B. Tech	68%	2017
HSC	75%	2012
SSC	78%	2010
