Professional Summary:

- 6 Years of experience as Oracle Database Administration.
- Strong experience in oracle Installation and administration of Oracle 12c and 19c on RedHat Linux, Windows
- Having good knowledge on Oracle Architecture
- Experience in ASM and RAC.
- Involved in Linux basics activities like Files sharing through scp, ftp
- Experience in handling production database support and maintenance as well.
- Experience in Database Creation, Table space management, User management, Table/Index management, Database Links
- Experience in patching, up gradation, and migration of Database.
- Experience in configuration of Data guard and Performing DR drills.
- Having experience in RMAN cloning and schema refreshing
- Having good experience with the utilities like exp/imp and data pump
- Experience in User Management, Privileges, Roles, Profile
- Experience in scheduling the jobs using cron
- Perform Query tuning, Instance/Memory tuning by using Explain Plan, ADDM, AWR
- Having greater ability to upgrade the new technologies.
- Experience in configuration of Golden gate

Professional Experience:

- Worked as an ORACLE DBA in BUZZWORKS from May 2018 to 2023

Jan.

- Working as an ORACLE DBA in Foraysoft from 2023 Jan to Nov.
- Working as an ORACLE DBA in Euclid innovation from 2023 Dec to till date.

Education:

- MCA from OSMANIA UNIVERSITY 2011

Technical Skills:

- **Database** : Oracle 12c/19c
- **Operating systems** : Redhat Linux 6.4, AIX 7 Power system, Windows
- **Languages** : SQL
- **Tools** : SQL*Plus, Import/Export, datapump, Putty, Xming, OEM
- **Performance Tools** : Tuning advisor, Explain plan, AWR.

Project Profile3

Client : JPMC

Role & Responsibilities:

- Installed oracle binaries and oracle client software.
- Monitoring table spaces and adding datafiles when required.
- Monitoring mount points and archive destination and alert log.
- Configured tnsnames and listeners.

- Monitoring Golden gate OGG process
- Clone database from PROD to UAT using RMAN
- Created new databases using dbca/manual and users, tablespaces for new builds.
- Worked on various activities scheduled on client side.
- Taking RMAN backups and exp backups on daily basis.
- Performed schema refreshes.
- Fixed various vulnerability as per client.
- Fixed performance related issues.
- Stop/start cluster database during linux patching.
- Golden gate configuration.
- Data copy using sqlloader

Project Profile2

Client : TCS

Role & Responsibilities:

- Installed oracle binaries and oracle client software.
- Monitoring table spaces and adding datafiles when required.
- Monitoring mount points and archive destination and alert log.
- Configured tnsnames and listeners.
- Applying security patches on databases.
- Clone database from PROD to UAT using RMAN
- Created new databases using dbca/manual and users, tablespaces for new builds.

- Worked on various activities scheduled on client side.
- Converting physical standby database to snapshot mode for testing.
- Taking RMAN backups and exp backups on daily basis.
- Performed schema refreshes.
- Fixed various vulnerability as per client.
- Prepared RCA for various issues.
- Fixed performance related issues.
- Stop/start cluster database during linux patching.
- Golden gate configuration.

Project 1

Client : HDFC

Role & Responsibilities:

- Performance tuning
- RAC configuration and maintainance and ASM
- Monitoring table spaces and adding datafiles when required.
- Monitoring mount points and archive destination and alert log.
- Configured tnsnames and listeners.
- Applying security patches on databases.
- Clone database from PROD to UAT using RMAN
- Created new databases using dbca/manual and users, tablespaces for new builds.
- Worked on various activities scheduled on client side.
- Converting physical standby database to snapshot mode for testing.
- Taking RMAN backups and exp backups on daily basis.
- Performed schema refreshes.
