## PROFESSIONAL SUMMARY

---

With 6 years of experience in the IT industry, I specialize in object-oriented programming analysis and possess comprehensive knowledge of the full software development life cycle (SDLC), including software specifications, design, development, testing, and deployment. My expertise lies in the development and deployment of web-based and Client-Server business applications using Java, J2EE, Frameworks, and UI technologies. I am now seeking a challenging role in a company where I can further enhance my skills and expertise while making meaningful contributions to the company's growth and success.

---

## SKILLS

---

- Accomplished individual contributor consistently meeting project deadlines.
- Proficient in Java 1.8 and Java 11 with hands-on experience in developing applications.
- Working experience in Spring Boot and Micro services.
- Skilled in developing and consuming SOAP and REST services.
- Proficient in JPA and Hibernate, improving database query efficiency.
- Extensive knowledge of HTML, CSS, and JavaScript resulting in improved front-end development.
- Proficient in Struts, Spring MVC, and Spring Batch, delivering efficient project modules on time.
- Experienced in working with databases such as Oracle, MySQL, MariaDB, and NoSQL
- Proficient in Servlets and JSPs, enhancing dynamic web page generation.
- Hands-on experience with version control systems including SVN, GIT, and Bitbucket.
- Experienced in using JIRA and Agile methodology.
- Skilled in Unix/Linux and proficient in utilizing Postman Tool for API testing.
- Proficient in Maven and JUnit, streamlining the build and testing process.
- Experienced in Jenkins and SonarQube for continuous integration and code quality analysis.
- Proficient in using Eclipse IDE, STS, and IntelliJ
- Experienced in Spring Cloud and Keycloak security.
- Familiar with Apache Kafka event-driven architecture, enabling real-time data processing.
- Acquainted with Docker and Kubernetes, contributing to efficient containerization and orchestration of applications.

## WORK HISTORY

---

### HCL Tech

**Consultant** - 06/2022 - Present

#### Project: FPMS

**Description:** FPMS is a key insurance project for Great Eastern, integrating new business unit (NBU), Claims, Billing contract payments, Customer service, and financial modules. Enhanced operational efficiency by establishing FPMS to cater to the insurance needs of Malaysia, Singapore, and Indonesia. Optimized insurance processes by implementing FPMS, enabling seamless creation of new policies, collection of premiums, and management of customer service and claim cases.

#### Responsibilities

- Worked on claim module and complete life of claim process.
- Worked on policy creation life cycle for different policies and products.
- Discovered and fixed 30+ programming bugs.
- Worked on Batch job processing for daily, week, month jobs and reports.
- Implemented new Enhancements for Great Multi Gen product, Premium collection and utilizations and Customer service DPS product.
- Involved in all stages deployments development, UAT, SIT and Prod environments.

**Project: Single customer view (C360)**

**Description:** Developed a dashboard to provide a 360-degree view of customers, as part of the strategic retail transaction program. Led the enhancement of the single customer view journey across multiple touch points in Malaysia and Thailand over the next 3 years. Improved customer experience and satisfaction by ensuring consistent service across channels and faster response times.

**Responsibilities**

- Created a GCR application for Relationship Managers and bank branches to access end-to-end customer details in the SCV360.
- Successfully implemented two micro services, including Summary and Service, with a range of APIs to deliver key customer insights and data.
- Developed and integrated three crucial APIs within the micro services, specifically focusing on customer services, digital activity, and alerts.
- Implemented spring batch processing for various vital processes, covering BWC, Card link, FIS, GTD, RBK, ICH, LNS, RIMS, SPL, WMS, and T-Group.

**Virtusa Consulting Services****Associate Consultant** 08/2018 - 06/2022**Project: Mobile Citi business and home loan**

**Description:** Implemented Citi business customer login, Home loan, and UPI in Mobile application. Designed particular features for business customers including Account summary, fund transfers, Bulk files upload, and authorization, File Remit tax online. Enhanced Home loan customer experience by enabling them to view account summary, pay home loan, and view/download interest certificates.

**Responsibilities**

- Implemented and involved in UPI Send Money, Request Money, Transaction History, Create Mandate, my mandate and Scan & Pay features.
- Delivered new development project of Citi business customer, Transaction's initiation and authorization.
- Implemented new home loan features in Citi Mobile Application to enhance customer satisfaction.
- Developed and enforced restrictions on high-risk transactions in the Citi Mobile application, resulting in improved security.

**Project: Citi Internet banking**

**Description:** Extended benefits for Citi Internet banking customers in areas of Banking, Credit card, home loan, Investments, and Personal loan. Streamlined fund transfers for banking section customers for Citibank to Citibank, Citibank to other bank (NEFT, RTGS, and IMPS), ICT, Demand draft. Facilitated Credit card customers to pay credit card bills, perform mobile recharges, and avail card block/unblock services.

**Responsibilities**

- Worked with Pan Inquiry and PWP services as part of vulnerable components migration.
- Worked on Content management system.
- Implemented new enhancements and bug fix changes.
- Involved in all the phases of Software Development Life Cycle (Software Specifications, Design, Development, Testing and Deployment)

---

**EDUCATION**

---

I Graduated in B-Tech through JNTK affiliated Universal college of engineering & Technology Guntur, AP.
