EY LLP | Dadar Mumbai

Associate Consultant

Currently, I am working as an L2 in the Security Architecture team. In this role, my responsibilities include:

Zscaler Proxy:

Defining security policies for internet access, specifying rules for URL filtering, threat protection, and more.

Accessing reports and analytics to monitor network activity, user behavior, and security incidents.

Defining access policies for specific applications, determining who can access them and under what conditions.

Implementing network segmentation to control access between different parts of the network.

Monitoring and troubleshooting user activity, addressing connectivity issues, and ensuring secure access to private applications.

Managing and securing the organization's network, maintaining a balance between accessibility and security.

Endpoint Security Configuration:

Configure and manage endpoint security settings for protection against malware, ransomware, and other threats.

Policy Management:

Define and enforce security policies for endpoints to ensure compliance with security standards.

Endpoint Detection and Response (EDR):

Utilize EDR capabilities to detect, investigate, and respond to advanced threats on endpoints.
