Work Experience

Oct 2021 - Apr 2023

Sr UIUX Designer
Infojini Consulting

- **Gathering Requirements:** Collect and evaluate user

requirements with the help of product managers and engineers.

- **Information Architecture:** Developing the information architecture of the product, including user journey and navigation structures should be done to ensure content is organized and easily accessible.
- **Wireframing:** Create low fidelity and high fidelity wireframes for all the screens using paper pencil or wireframe tools (Balsamiq, Mockflow etc.).
- **User Interface (UI) Design:** Create visual designs for user interfaces, including layouts, colors, typography, and graphical elements, ensuring consistency with design system and usability principles.
- **Prototyping:** Building an interactive prototype using tools like Figma, or Adobe XD to demonstrate and test the product's functionality and user experience
