Energetic and curious driven application developer and technical lead with more than 8+ years of experience. Writes clean code of the highest quality, designs the optimized system, and provides business oriented solutions.

EDUCATION

- Bachelor of Science(computer)
2014: Mumbai University: NKTT Collage, Thane

WORK EXPERIENCE:

Ingram Micro India PVT. LTD (August 2018 - Present)

Lead Software Engineer (Lead And Individual Contributor)

- I spearheaded the regional **APAC application team**, guiding the development of optimized solutions to address both business needs and team objectives effectively.
- Working with Product Development, coordinating with different team, product managers, UI/UX, business and the global team to ensure quality and scalability.
- I am currently engaged in a project leveraging Microsoft Dynamics 365 CRM alongside a tech stack comprising **React JS, TypeScript, C#, ASP.NET Core Web API, and Azure Cloud services**. Our objective is to streamline business processes, particularly geared towards enhancing sales performance.
- I developed a portal to streamline a one of the business processes, incorporating both internal and external approvals. This resulted in a reduction of manual work from 2-3 days to just a 2-hour turnaround time.
- Has good experience with **Azure DevOps, Pipeline, GitHub, Bitbucket, and Microservices**.

NeoSoft Technologies PVT. LTD (November 2016 - August 2018)

Software Developer

- I automated the generation of various types of letters (such as offer letters, experience letters, termination letters, and appointment letters) for over 10000+ employees within our HRMS product. This implementation reduced manual effort significantly for the HR team, streamlining the process to generate these letters in just 1 minute for employees.
- Developed and implemented an automated end-to-end employee lifecycle management system, streamlining processes from onboarding to resignation and final settlement. This system digitizes the joining process, manages employment status changes, facilitates resignation applications, and ensures seamless full and final settlements. As a result, manual intervention is significantly reduced, improving efficiency, accuracy, and employee satisfaction throughout their journey within the organization.
- Technologies were used **ASP.NET MVC, ASP.NET WEB API, Azure BLOB, Azure Redis Javascript, JQuery, and MS SQL**

Chrome Solutions PVT. LTD (December 2015 - October 2016)

Software Developer

- Developed product with **Dot Net Technology** to run on web as well desktop for image processing.
- Implemented **OCR** engine to extract information from PDF Invoice for automation and further processing to reduce man power and faster processing.
- Optimized the business process from 2-3 days to 1-2 hours TAT.
