Mumbai, India

## SUMMARY

With 8 years of diverse experience in software development, I specialize in building and scaling applications from the ground up. My journey began with freelancing, where I honed my skills in bootstrapping projects across various domains. For the past 4 years, I've been deeply involved in a startup, where I led the development of a successful SaaS application now serving over 9,000 users. Starting as an Android developer, I transitioned to backend development, where I extensively used PHP and the Laravel framework, before moving into frontend development with Vue and React. My role also included significant work with AWS, ensuring the application's scalability and reliability. As a Lead Software Engineer, I worked closely with a team of senior developers, driving the project from conception to a fully-fledged product. My expertise spans Android development, backend and frontend technologies, and cloud services, making me a well-rounded full-stack developer capable of leading complex software projects.

## EXPERIENCE

### Senior Full-Stack Developer

#### Thalia Technologies

09/2020 - Present Mumbai, India

- Worked on CSVBox.io from its inception, including designing its architecture.
- Set up servers and implemented load balancing for optimal performance.
- Developed npm libraries for Vue, React, and Angular to enhance end-user experience.
- Interacted with users to address special needs and tailored solutions accordingly.
- Managed bug/issue tickets, providing timely resolutions as needed.
- Led and mentored two junior developers, guiding their work and growth.
- Proposed and implemented features and solutions to make the system robust, user-friendly, and adaptable.
- Worked extensively to achieve SOC2 Type II compliance, ensuring robust system security and adherence to industry standards.

### Software Engineer

#### Axenous

06/2018 - 08/2020 Mumbai, India

- Served multiple clients as a freelancer, with a prominent project for Mumbai Railway Police.
- Developed the official website for Mumbai Railway Police under the guidance of the then Commissioner of Police.
- Created an accident reporting system that streamlined data processing, significantly reducing report processing time from a week to near-instant.
- Worked on a pilot project for facial recognition technology to analyze a large database of criminals.

### Junior Software Developer

#### Redon Solutions

09/2016 - 05/2018 Mumbai, India

- Developed multiple android applications, meeting various client requirements.
- Engaged directly with clients to understand their needs and deliver tailored solutions.
- Gained experience in PHP for API development to support Android applications.
- Headed the development of "VB on the Web," an OTT platform for Vikram Bhatt's Loneranger Productions Pvt. Ltd.
