SKILLS

- Test Team Management
- Test Planning and Execution
- Automation Framework - BDD Framework, POM, TestNG.
- Selenium Web driver
- Cucumber
- TestNG
- Gerkin
- Java
- OOPS
- API Testing- Postman
- REST Assured
- Docker Containers
- NewMan
- WireMock
- GraphQL
- JIRA
- Junit
- SQL
- XML
- JSON

AashayKhobragade

Senior QA Automation Analyst L1

Methodical QA professional with 6.5 years of industry experience (4.5+ in Automation and 2+ years in Manual Testing) in Financial, Banking, Sales Domain and Ecommerce with optimal testing strategies, open and clear communicator with multitasking skills, organized nature, and strong attention to detail. I bring over a decade of experience in diverse areas of API and UI Automation Testing with expertise in creating frameworks from scratch and setting up CI/CD pipelines for the project using tools like GitHub Actions, Jenkins along with the use of Docker Containers.

Certified in Tosca Automation Tool (AS2 Level, Sep 2016).
Selenium Advance training program in Accenture (Dec 2017).
Completed training and have a strong work experience in Postman, Web Services, API Testing, REST Assured APIs, Docker Containers.

PROFILE HIGHLIGHTS

- Strong structured testing knowledge and thorough understanding of quality assurance testing methodologies & concepts, demonstrating deep knowledge and hands on experience mainly with Functional and Automation testing across web and desktop applications.
- **4.5+** years of strong experience in Frontend and **Backend** Automation using **Java Selenium Webdriver, TestNg, BDD (Cucumber JVM) Framework, Postman, Web Services, REST Assured APIs.**
- Led high-performing **QA Team of 6 members** for every release and mentored junior QA's.
- Around **2.5+ years** of experience in Leading QA projects and Team through various life cycle models.
- Good Understanding of the **Java** programming language for test script development, including **object-oriented programming**, data manipulation, and **exception handling**.
- Proficient in utilizing **Docker** to streamline testing processes, enhance reproducibility, and ensure consistent environments for testing across the software development lifecycle.

- Jenkins pipeline
- Maven
- GIT
- TOSCA
- TFS(Team Foundation Server)
- Financial, Banking,Sales Domains
- Regression Testing
- Agile, Kanban
- HP ALM

AWARDS

ACE Excellence Award (Accenture Celebrates Excellence)

CERTIFICATIONS

TOSCA (AS2 Level, Sep 2016)

Selenium Advanced Training in Accenture(Dec 2017)

REST API Testing-REST Assured Java(2022)

EXTRACURRICULAR ACTIVITIES

Part of the management team in Annual FS MOSAIC fest in Accenture every year both in Hyderabad and Bangalore.

Worked as Model Face in Accenture Marketing Team for consecutive years.

Organized QA Quizzes every month in Team.

- Expertise in using **WireMock** to simulate API responses, stub external dependencies, and validate system behavior in isolation.
- Expertise in using **GraphQL** for API testing, including creating test queries and mutations, validating responses, and ensuring API consistency.
- Impressive success in facilitating projects & execution of project releases using **Agile** as well as **Kanban** methodology.
- Drove and built Test Automation Framework from scratch using **POM** and **BDD** Cucumber with Selenium Java Web driver.
- Expertise in writing **Gherkin feature files, step definitions**, and implementing test scenarios.
- Experience in **CI/CD** pipelines using **Jenkins, NewMan** and Skilled in using version control systems like **Git** for code **repository management**
- Experience in database skills during Database migration testing and test data creation using **SQL** server management.
- Extensive experience and knowledge in Testing lifecycle and core Testing Techniques using different Test approaches, Requirements / Functional Analysis, Test Planning, Test Estimations, Test Preparations, Test Execution, Test Reporting and Defect Management, Preparation of weekly and monthly status reports
- Owned the on-time delivery, risk identification & mitigation planning for the entire cycle of the program.
- Resource forecasting and planning and Experience of using test management tools (**JIRA, HP ALM, TFS**) to manage testing activity and to provide testing metrics.
- Mentored team on Automation Scripts development, Test Execution, Requirement analysis & skill development.
- Experience in Smoke, Sanity, GUI, Functional, End to End Testing, Regression Testing, Cross- browser testing in Mobile (Android, iOS) Interfaces..
- Executed Regression Automation scripts for every release and shared bugs, failed test cases via emails to team.
- Received **Client Appreciations** for day to day work and extended hours for the deliverables.

PROFESSIONAL EXPERIENCE

- **Clarion Technologies • Pune • Jan 2022 - July 2023.**

Project 1–Worked in an ecommerce project (a multi-brand retailer of luxury brands) as **Senior QA Engineer L1**. Shared responsibility for automating Test scripts in Java Selenium Webdriver using **TestNg** Framework. Designed and developed automated test suites using **TestNG** and Selenium WebDriver to validate the functionality, usability, and performance of web applications

Project 2- Worked in an ecommerce project as a **Backend QA Automation Engineer** in **REST APIs** using Postman. Developed and maintained a library of reusable **WireMock stubs** to mimic various API responses and edge cases, ensuring comprehensive API test coverage. Designed and developed automated test suites for **GraphQL APIs**, utilizing tools and libraries to efficiently create and execute test cases.

- **Nytro.ai • Bangalore • Sep 2019 - March 2021.**

Project 1- Worked as **Senior Automation Analyst** in E-Commerce sales domain project (a Sales Onboarding and Readiness platform) shared responsibility for developing Automation Test Scripts for every release, Test Planning, Test Estimations, Test Preparations, Test Execution with **Java Selenium in BDD Cucumber Framework**. Expertise in writing **Gherkin feature files, step definitions**, and implementing test scenarios. Skilled in using version control systems like **Git** for code repository management.

- **Accenture • Hyderabad • Aug 2015 - Sep 2018.**

Project 1- Joined as **Associate Software Engineer** in a Banking Project and worked as Functional Testing role (SIT, UAT) with writing test scripts, End to end testing. Uploading the scripts and defects logging in the Quality Center. Strong knowledge of software testing methodologies, test planning, and test case designs.

Project 2 - Worked as **Software Engineer** in Banking Project and shared responsibility for Functional and automation of high level test cases using Selenium Webdriver in Page Object model framework. Skilled in test execution, defect identification, and defect tracking using industry-standard tools.

EDUCATION & CREDENTIALS

Bachelors In Science
Manipal University , Jaipur
May 2015
