### Technical Skills:

- Java, Ruby
- Selenium WebDriver
- Watir WebDriver
- Web Services / REST API
- MS-SQL / Oracle / MongoDB
- Test-NG / Maven
- Cucumber BDD
- GitHub / GitLab
- Eclipse / IntelliJ / RubyMine
- Web Automation
- API Automation
- Go-cd / Circle-Cl / Jenkins
- Postman
- Rally / JIRA / HP-ALM
- Kibana
- Windows / Linux / Mac

### Domain Expertise:

- Comms & Media
- OTT
- BFSI

### Experience Summary:

#### 1. SLK SOFTWARE

(Joining: August/2021, Current Organization)

Client: M&T Bank

Tools & Technologies: Ruby, Watir, Cucumber BDD, MS-SQL, Oracle, JIRA

- Involved in UI Automation using ruby with hybrid framework
- Develop project concepts and maintain optimal workflow.
- Worked on the NICE-Actimize Application for tracking financial frauds like:
  - Anti-Money Laundering
  - Automatic Clearing House
  - Real Time Payments
  - Debit Cards
- Created a hybrid framework to validate the UI for KYC related application
- Work with senior developer to manage large, complex design projects for corporate clients.
- Worked on scenarios like roles & permission based validations, tickets tracking workflow.
- Independently handling the module in the project and all the communications with clients.
- Carry out quality assurance tests to discover errors and optimize usability.

#### 2. GlobalLogic, A Hitachi Group Company

(Duration: August/2019 to August/2021) 2 Years

Client: Discovery Digital (Discovery Channel)

Tools & Technologies: Ruby, Selenium, Cucumber BDD, RSpec, POSTMAN, TestRail, JIRA

- Worked on API Automation using ruby & Rspec framework.
- Handled Web Automation Project individually for Golf TV channel, a part of Discovery Communications using Ruby & BDD Framework
- Created a project from scratch on Roku-TV Automation using Suitest Tool with JavaScript hybrid framework.
- Independently handling the module in the project and all the communications with clients
- Basic exposure to other platforms testing like Appium, iOS Automation and Apple-TV.

**Soft Skills:**

- Project management
- Strong decision maker
- Complex problem solver
- Creative design
- Innovative
- Service-focused

**Awards & Recognition:**

- “Best New Recruit” for quickly understanding the project and start delivering.
- “SPOT Award” & “Pillar of the Month” for consistent high performance
- “QE&A Pride” for outstanding contribution in automation framework

**Academics:**

Graduation:  
Electronics & Communications  
Engineering  
Batch: 2011-15  
CGPA: 8.1  
University: Swami Vivekanand  
Technical University,  
Chhattisgarh

Certifications:  
Core Java / JDBC and Web  
Development Technologies  
From: JSpiders, Bangalore  
Duration:  
Sep – 2015 to Apr – 2016

**Preferred Location:**

Bangalore, Pune

**3. Cognizant Technology Services**

(Duration: 05/2016 to 08/2019) 3.3 Years

Client: COMCAST Communications Inc.

Project 1: NextGen Modesto / SIK (Self Installation Kit)

Tools and Technologies Used: SoapUI, Selenium, SQL Server, Maven, POSTMAN, Kibana, TestNG, Rally

- This project was focused on OMS which is order management system, where a comcast user can place an order for self-installable devices such as modem, phone and other devices.
- Exposure in developing test scripts in Selenium WebDriver using Java and TestNG.
- Involved in code review, KT for the team members and weekly and quarterly client calls.
- Responsible for developing, fixing and maintaining test scripts for daily regression
- Establish Quality Procedure for the team and continuously monitor and audit to ensure team
- Carry out quality assurance tests to discover errors and optimize usability.

Project 2: CMP (Comcast Messaging Platform)

Tools and Technologies Used: HP-ALM, Rally, SOAP-UI, Visual Studio with C#, SQL Server

- Scripting of Test cases for Automation testing according to the requirements by using Visual Studio and C#
- Maintaining the regression automation suite and smoke suite and performing daily regression.
- Writing SQL queries for database validation.
