ABOUT ME

Eligible to work in the Netherlands without sponsorship.

Highly skilled and experienced SAP ABAP Developer with over 9 years of expertise in designing, coding, and implementing customized solutions within the SAP ERP and S/4 HANA systems. Proficient in ABAP programming and adept at creating efficient, scalable applications that enhance business processes and support enterprise-wide systems. Proven track record of leading technical teams to deliver high-quality, scalable applications that optimize business processes and enhance system performance, achieved successful project completions. Demonstrated ability to translate business requirements into technical specifications and deliver robust, reliable solutions. Strong problem-solving skills, with a deep understanding of SAP modules (SD, MM, FI/CO). Adept at collaborating with cross-functional teams for planning and to understand their needs to ensure SAP solutions meet their requirements for the process improvement, mentoring junior developers and continuously updating skills to keep pace with evolving technologies. Committed to driving innovation and operational excellence in SAP environments.

WORK EXPERIENCE

Senior Application Developer
Fujitsu / May 2022 – May 2024

- Developed and implemented complex, customized applications using cutting-edge technologies to meet Japanese client's specific business needs, resulting in improved efficiency and enhanced user experience.
- Crafted CDS views and AMDP classes to enhance data processing and reporting capabilities for SAP SD and MM modules.
- Designed and integrated ADOBE Forms to meet diverse client specifications, improving form management within web Dynpro applications.
- Utilized advanced ABAP OOPS concepts to address complex business challenges and developed JSON/XML APIs for effective cross-functional collaboration.
- Collaborated with cross-functionals teams from Japan region to analyze requirements and design robust software solutions, ensuring seamless integration with existing systems and adherence to industry standards.
- Led a team of technical developers in end-to-end development projects with agile methodology, providing technical guidance, conducting code reviews, and ensuring timely delivery of high-quality software products. Optimized application performance through continuous integration and deployment, implementing rigorous testing methodologies and identifying and resolving software bugs to ensure a seamless user experience.

Associate consultant
ATOS INDIA / Mumbai / May 2015 - May 2022

- Launched SAP career at ATOS, delivering support projects for a European client base.
 - Developed ABAP programs including BDCs, Module pool, Smart Forms, Enhancements, BTEs, BADIs, SNOTE Implementations, BAPIs, and IDOCs.
 - Utilized ABAP programming tools for report and transaction creation.
 - Designed and maintained Data Dictionary objects such as Tables, Views, and Structures, including Table maintenance.
 - Collaborated with the functional team to resolve production issues efficiently.
 - Gained comprehensive knowledge of SAP modules, including SD, FI and MM.
 - Played a pivotal role in two end-to-end development projects targeting the US and Indian markets.
 - Collaborated with cross-functional teams for planing and to understand their needs to ensure SAP solutions meet their business requirements for the process improvement.
 - Project Lead and Developer:** Engaged in the initial phase of project planning and analysis, thoroughly understanding business requirements and translating them into effective technical solutions.
- Successfully managed and executed a comprehensive project independently, developing a robust SAP payment gateway for vendor and customer transactions. This solution integrated both automatic and manual payment processes, salary processing, and reverse file UTR update features (FI), fortified with server-level encryption.
- Project Scope:** Designed and implemented the payment gateway, ensuring seamless integration with existing systems and compliance with financial regulations.
- Technical Leadership:** Provided continuous support to clients during the post-implementation phase, ensuring smooth operation and addressing any issues promptly.
- Team Leadership:** Subsequently led a small technical team, guiding them in maintaining and enhancing the payment gateway, and mentoring junior developers to elevate team performance.
