- Provided continuing support for software users

PROGRAMMER ANALYST

Aug 2015 - Feb 2017 | Fidelity National Information Services(FIS) , BANGALORE

- Enhancement of the web application using Java, J2EE, Spring MVC and Hibernate.
- All the web services in different functional units in the system are Rest API services.
- Used Java and multiple layers to offer abstraction for the business from the database related code (CRUD)
- Reviewing Application team's Entity Relationship Model to ensure optimal engineering approach was being followed.

EDUCATION

BSC

SAMBALPUR UNIVERSITY , SAMBALPUR,ODISHA | Graduated in 2007

MCA

VSSUT , SAMBALPUR,ODISHA | Graduated in 2010

PROJECTS

WL

This is a FIS online web application project which integrated with core Lending System and implemented as an additional feature for the CORE Application. This is a secure and safe online web application that allows end-user customers of a financial institution.

PLM

The Specifications Support system (SPEC) is a subsystem of the manufacturing integrated product/process/plant system (MIPS). SPEC is designed to provide methods for maintaining and reviewing product specifications and to develop automated manufacturing and testing information support capabilities that depend on such data for NXP.

MODX

This project deals with the solutions for the end users in a secure and reliable manner. Integration and migration of legacy application with Industry standard cutting edge technologies such as Microservices.
