 aishwaryababali4@gmail.com  
 Bangalore

## Education

---

KLS Vishwanath Rao Deshpande  
Institution Of Technology.  
BE in Computer Science  
Engineering

## Tools Used

---

- STS
- POSTMAN
- IntelliJ IDEA
- Microservices
- MySQL Workbench
- Git & GitHub
- AWS

## Java Developer

---

Dedicated, creative and highly motivated IT Professional with 4+ years of Software Development expertise in Java/JAVA8 ,OOPS concept, Spring Boot, Spring MVC, Spring Security, Web Services, RESTAPI, Microservices, Hibernate, MySQL, AWS etc. A good team player with efficient organizational and communication skills.

## Technical Skills

---

- Core java / java 8
- Spring Boot
- Hibernate JPA
- Spring MVC
- Servlet, JSP
- RESTful APIs and web services
- Microservices
- Git & Git Hub
- Debugging
- JSP
- Spring Security
- My SQL
- Testing API using POSTMAN
- JWT (JSON Web Tokens)
- Deployment of web applications using AWS
- Agile Scrum Methodologies

## WORK EXPERIENCE

---

**Company Name: Intech Software Solutions**

**From : January 2023 to June 2024**

Homes2.3.6 an Real estate project which was used relationships and interactions, which would basically helps buyers connect with the sellers, and Owners connect with Tenants, and also has a subscription plans in portal. Additional services like painting for a hassle-free living experience, packers and movers for shifting homes with no third party direct connection with executive, plumbing services, Renovation services and many more. Embrace hassle-free living with our subscription-based model.

### Roles and Responsibilities

- Successfully contributed to the development of an application using the Model-View-Controller(MVC)architecture, ensuring scalable and maintainable in Spring boot codebase.
- Designed and implemented RESTful web services endpoints using Spring Boot.
- Creating and maintaining ER diagrams for database design in My Sql workbench.
- Integrated third-party APIs for SMS and Email services into the application, enhancing communication features within the application using **Microservices** and razorPay.
- Utilized third-party libraries to efficiently generate Excel/PDF-based reports, optimizing report generation process.
- Developed Rest Controllers, Services, and Repository layers using Spring Boot ensuring a modular and well-structured application.
- Implemented Authentication and Authorization mechanisms using Spring Security with JWT tokens ,ensuring secure access to resources.
- Utilizing Lombok and Model Mapper libraries to streamline code development ,reducing boilerplate code and improving code maintainability in the project.
- Integrated a test payment gateway, ensuring secure and reliable financial transaction.
- Utilized and maintaining API documentation using Swagger for clear and accessibility and understanding of the developed API.
- Utilizing Java 8 features, such as Stream API, to enhance code readability and performance.
- Diagnosed and fixed defects through debugging processes in Intelli J IDEA, contributing to the overall stability and reliability of the application.
- Attending daily stand-up meetings for project updates on progress and discussing potential roadblocks to ensure project alignment with goals.
- Developed and maintaining entity classes using Hibernate Java Persistence API (JPA), optimizing data access and persistence.
- Utilizing POSTMAN for testing and validating the functionality of RESTful APIs.
- Demonstrated expertise in utilizing Git for version control, maintaining a clean and well- documented history of code changes.
- Proficiently utilized Git & Git Hub for version control, ensuring effective collaboration and code management within development teams.

**Company Name: Accenture Private Ltd (Payroll: Adecco India Pvt Ltd)**  
**From: June 2022 to Jan 2023**

## **ClientConnect**

It is a technology used to manage interactions with customers and potential customers. This system helps organizations build customer relationships and streamline processes so they can increase sales, improve customer service, and increase profitability. Identify and involve key stakeholders such as customer support, and IT teams. Understand their requirements and expectations.

### **Roles and Responsibilities**

- Help to resolve Software and technical issues for employees efficiently and effectively.
- Developing view using JSP, Analyze Java code, logs, and stack traces to identify the root cause of problems and resolve application issues.
- Manage all owned non compliances to Resolution, ensuring accurate the ongoing communication to all impacted group.
- Perform root cause analysis and manage the delivery of agreed follow ups after incidents.
- Implement security patches and measures to protect against vulnerabilities.
- Apply patches and updates to Java applications, libraries, and frameworks.
- Provide assistance for detailed analysis of non compliances /request Incidents in remotely.
- Co-ordinate with customers to resolve the Non-compliances issues within the resolution time based on the priorities
- Access the customer's needs and translation into solutions like software installations, setup files.

## Air Hub12.2

**Company Name: Spring Infotech Private Ltd**

**From: May 2020 to June 2022**

Air Hub12.2 is a Java Spring Boot project designed for efficient flight reservations. Users can easily navigate through available flights, select seats, and make secure online payments. Users can see detailed information about each flight, including airline, departure and arrival times, layovers, and ticket prices. The system prioritizes an intuitive user interface and effective communication of flight details.

### Roles and Responsibilities

- Successfully contributed to the development of an application using the Model-View-Controller(MVC)architecture, ensuring scalable and maintainable codebase.
- Developing view using JSP, Analyze Java code, logs, and stack traces to identify the root cause of problems and resolve application issues.
- Manage all owned non compliances to Resolution, ensuring accurate the ongoing communication to all impacted group.
- Perform root cause analysis and manage the delivery of agreed follow ups after incidents.
- Implement security patches and measures to protect against vulnerabilities.
- Designed and implemented RESTful web services endpoints using Spring Boot.
- Creating and maintaining Entity-Relationship (ER) diagrams for database design.
- Integrated third-party APIs for SMS and Email services into the application, enhancing communication features within the application.
- Utilized third-party libraries to efficiently generate Excel/PDF-based reports, optimizing report generation process.
- Developed Rest Controllers, Services, and Repository layers using Spring Boot ensuring a modular and well-structured application.
- Implemented Authentication and Authorization mechanisms using Spring Security with JWT tokens ,ensuring secure access to resources.
- Utilizing Lombok and Model Mapper libraries to streamline code development ,reducing boilerplate code and improving code maintainability in the project.
