

Objective: To work in a challenging environment that will provide me exciting opportunities to learn more and utilize my technical skills and hence contribute my best to the organization

Professional Experience:-

- 5 Years of experience in designing and implementing scalable web applications. Proven expertise in Angular, performance optimization, REST Api integration, Responsive design, collaborating with cross-functional teams to deliver high quality solutions.

Professional Summary

- Having 5 years of experience in developing Web Applications using HTML, CSS, JavaScript, TypeScript, Angular (8, 10, and 14), Angular Js, Bootstrap, Reactjs, and Material UI.
- Experience in working with Angular (8, 10, and 14) modules, services, templates, directives, services, and dependency injection to create a SPA
- Good Experience in Angular (8, 10, and 14) framework and its ability to create simple and scalable code for SPA.
- Good work done on Reactive forms in Angular (8, 10, and 14) and their Validations.
- Experience in implementation of state management in Angular by using NGRX.
- Experience in writing unit tests in angular using Jasmine and Karma.
- Experience in using Chrome Developer Tools for debugging and troubleshooting the code.
- Experience in creating user validation forms and sending data to servers using RESTful services.
- Extensively used the repositories like GIT and SVN.
- Extensive experience working under Agile methodologies environment.
- Experience with various IDEs such as Visual Studio Code, Sublime, and Notepad++.
- Experience in working on Windows, and Linux - Ubuntu operating systems.
- Experience in using JIRA Tool for managing the work and project.
- Mentor and guide junior developer

Technical Skills::

Operating System	Windows 7/10
Web Technologies:	HTML5, CSS3, SCSS
Languages	Javascript, ES6, Typescript,
Frameworks	Angular 14, PrimeNG-v5, Reactjs, NgRx, rxjs
APIs	RESTful Services
Methodologies	Agile/scrum
UI component library	PrimeNG, Bootstrap, Angular Material.

Highest Qualification.

- Master of Computer Applications-MCA from Osmania University-O.U ,Hyderabad.**
- Bachelore of Science-B.SC from Acharya Nagarjuna University-ANU ,Narasaraopet, Guntur Dt.**

Projects Summary:-

Company: CGI Information systems, Bengaluru/Bengalore, Karnataka

Client: Numeracle Portal

Role: UI- Angular Developer

skillset: PRIME-NG (v5), HTML, CSS, ANGULAR-v14.

Project: Numeracle Portal (Micro Frontend architecture)

Numeracle portal is used for checking the quality of call (controls) by using this portal we can reduce the chances of duplicate calls here we have different types of ranges like fraud, low, medium, high, we can prevent the duplicate data easily from entities(vendors).after certifying the phone number will create user that list upload in numera portal.

Accomplishments:

- Created the complete module structure and components based on the functionalities
- Created Common components for re-usability
- Integrating the UI code with the backend APIs.

- ☛ Used JIRA for issue tracking and GIT is used as a version control tool
- ☛ Implementation of NGRX with actions, effects, reducers, and selectors for all the pages from scratch.
- ☛ Responsible to work closely with the QA team and make Dev team fix and close the issues raised for JAWS.
- ☛ Complete deliverables in the planned timeframe and maintained constant communication with customers and Conduct demos for show-casing progress in work for early feedback.
- ☛ Responsible for gathering knowledge from clients on requirements.
- ☛ Participate in team meetings and planning of task divisions.

***Company:** Supreme Net Soft Pvt. Ltd, Hyderabad | **H Y D , T S**

Client: Dhanwantari Foundation International

Role: UI/UX DEVELOPER

skillset: Bootstrap, HTML5, CSS3, ANGULAR-v8

Project: DFI (Dhanwantari Foundation International)

A foundation aimed to uplift the lives of Brahmin sects. This consisted of several modules from memberships, investments, lands and organizations. An application that operated with intranet portal -consisting of employees in foundation and internet portal- that was made accessible to the external users or guest users.

Accomplishments:

- ☛ Working as Front End Developer in a team of size 4
- ☛ Involved in coding with AngularJS for developing web applications based on requirement
- ☛ ES6 features are used for writing the code.
- ☛ Used NG6 starter for building the boilerplate for the project.
- ☛ Applied AngularJS validations in all the forms.
- ☛ Worked with UI designers to define screen designs
- ☛ Worked with REST/Web API to create services and used AngularJS HTTP service for fetching data from REST API's provided by the backend.
- ☛ Used GIT for version control and JIRA for defect tracking.
- ☛ Environment: AngularJS, ES6, NG6 Starter, Linux, Django, GIT, JIRA , Bitbucket
- ☛ Involved in development and deployment
- ☛ Responsive Design for Mobile & Tablets and responsive devices
- ☛ Involved in UI development and maintenance and enhancement of the applications
- ☛ Troubleshooting issues in Production, Development, and Test environments.

Project: Fund Pitch

skillset: Bootstrap, HTML, CSS, React JS

Role: Webdeveloper & ReactJS Developer

An Investment Platform where projects are showcased to the investors on invitation, the investors then have the option to express their interest that fosters the start and development of the projects. Projects can be created by Merchant Banker, Business Owners or admin providing the estimation parameters of the projects.

Accomplishments:

- Involved in testing process.
- Bug fixing if required and supported to the client during testing.
- Involved in debugging, website Design and project deployment.
- Responsible for designing the User interface
- Involved in development and deployment
- Sketching ideas and designs
- Website Wireframes, Layout Design, Visual Design
- Responsive Design for Mobile & Tablets and responsive devices
- CSS support for theme creation
- Involved in UI development and maintenance and enhancement of the applications
- Troubleshooting issues in Production, Development, and Test environments.
- Creating Web and Mobile app wireframes and visual design mockups to guide developers
- Creating html (blueprint framework) prototype
- Communicating with client

Project: Health care

skillset: Bootstrap, HTML, CSS, ANGULAR-2/4

Role: Webdeveloper & Angular developer

PICO BSA performs signal analysis in both Analog and Digital from various montages. This tool is limited to analysis of EEG data and not extended to provide any diagnostic conclusion about the patient's condition. Fornix med objective is to build a web portal to enable EEG data analysis using PICO BSA algorithm which is given by user.

Accomplishments:

- Understanding the business requirement for database and application design and Development.
- Making style guides to define UI elements
- Sketching ideas and designs
- Creating Web & Mobile app wireframes and visual design mockups to guide developers
- Creating responsive html prototype
- Communicating with team and other stakeholders
- Developing front-end screens in JavaScript and HTML.
- Client side validation using Java Script.

Project:Sastecacademy

skillset: Bootstrap,html,css,angular

Role: Webdeveloper & Angular developer <https://www.sastecacademy.com/>

A global leader in online tutoring services. When you register with SasTec Academy, your child gets access to a world-class education tailored to meet his or her unique academic needs.

Accomplishments:-

- Creating Web app wireframes and visual design mockups to guide developers
- Creating responsive html prototype
- Sharing data between the components.

Declaration:

I hereby declare that the above-furnished particulars are true to the best of my knowledge.
