PROJECT WORK AND INTERNSHIP

PROJECT NAME :

Project On **“DESIGN AND FABRICATION OF SMART SOLAR RAYS TRACKING SYSTEM”**

DESCRIPTION:

Sun energy is considered to be one of the most promising sources to address the world energy crises. Photovoltaic cells are one of the prominent sources of energy. The most important factors that affect the efficiency of solar cells are cell temperature, maximum power point tracking (MPPT) and energy conversion efficiency. The optimization of these factors improves solar cells efficiency for more reliable applications.

Internship On

1. STUDY OF SPRING MANUFACTURING PROCESS
2. BEML MYSURU
3. RPM MANUFACTURING INDUSTRIES

CERTIFICATION

- **NPTEL Certification On “Laser Based Manufacturing Process”**
