Designation: Software Engineer

Project#2: Ericson

Technologies: HTML, CSS, JS, REACT JS, REDUX

Role: React Developer

Team Size: 13

This project is telecom group serving while Claro has developed a large market share in Colombia, data for prepaid customers indicates that Claro has lost market share to competing providers Tigo and Movistar. This may be due to Claro's position as the most-expensive perminute provider in the country's prepaid market. Tigo and Movistar offer prepaid customers flat-rate per-minute plans for calls placed to all mobile service providers and landlines within Colombia.

Responsibilities:

- Extensively worked in Design part to easily understand the questions by the User.
- Providing the new solutions for the time slots.
- Used Integration to get the data from Database
- Working in coordination with the design and the testing team to develop better products with fewer bugs.

Designation: Software Engineer

Project#3: Pret portal

Technologies: HTML, CSS, TYPESCRIPT, REACT, JS, REDUX, NEXT JS, JAVA

Role: React Developer

Team Size: 11
