E-mail: anandbhalerao555@gmail.com

Focused IT professional offering **over 4 years** of experience ;targeting senior-level assignments in **Software Development** with an esteemed organization, preferably in **Pune**.

Soft Skills

Profile Summary

- ▶ Expertise in **Application Development Lifecycle** from designing & development, coding, testing, debugging, troubleshooting, and deployment, to maintenance support
- ▶ Currently excelling as a Sr. Software Engineer at Wipro, with a focus on **Java Back-End Development**, ensuring the quality of REST APIs.
- ▶ Possess a proactive and ambitious approach, with a strong focus on developing interpersonal skills and core competencies in **Java, Spring MVC, Security, ORM, JPA, Hibernate, REST Web Services, Microservices, and Spring Boot**.
- ▶ Skilled in **application development, Spring security, and API integration**, with a strong focus on delivering high-quality solutions and enhancing system reliability.
- ▶ Experienced in **leading the development of REST APIs and conducting Unit testing**, ensuring seamless integration of services and functionalities, troubleshooting reported issues, and recommending changes to improve Java application processes.
- ▶ Successfully led projects on **design, development & maintenance of Applications** from effort planning, scope management & activity sequencing, to quality & change management, while managing stakeholders to attain **delivery excellence**.
- ▶ **Conceptualized, developed, and applied mix of technologies** to minimize risks and ensure compliance with quality norms

Technical Skills

- ▶ **Frameworks and Libraries:** Java, Spring Boot, Spring, Hibernate, Spring Security, Docker,AWS
- ▶ **Build Tools:** Maven
- ▶ Amazon Web Services, Microservices Architecture
- ▶ **Testing:** JUnit
- ▶ **Version Control:** GitHub, Git
- ▶ **Database:** SQL, Oracle
- ▶ **Project Management:** JIRA
- ▶ **Web Technologies:** Servlet, JDBC, HTML, CSS, JavaScript, Angular, Restful API
- ▶ **IDEs:** Eclipse IDE, Spring Tool Suite

Core Competencies

Project Management

API Integration

Stakeholder Engagements

Software Development Lifecycle

Agile & Scrum Methodology

Requirement Gathering & Data Analysis

User Acceptance Testing

Troubleshooting & Debugging

Leadership & Team Building

Work Experience

April 2023 - Present | Wipro, Pune as Senior Software Engineer

March 2021 - April 2023 | Capgemini Technology Services India Limited, Pune as Software Engineer

August 2019- March 2021 | vertechz international LLP, Pune as Software Engineer.

Responsibilities:

- ▶ Gathering client requirements and actively participated in software and architectural development initiatives.
- ▶ Developing well-designed, efficient, and testable code, ensuring the seamless functioning of critical aspects of Spring security, API development, and integration.
- ▶ Conducting comprehensive software analysis, programming, testing, and debugging, ensuring the delivery of high-quality solutions.
- ▶ Proactively troubleshooting and resolving reported issues, consistently meeting queries in a timely manner.

- Preparing and producing releases of software components, ensuring the successful deployment of critical applications.
- Developing a robust security framework for reduction in security vulnerabilities and enhancing the overall reliability of the system.
- Leading the development of REST APIs, ensuring the seamless integration of various services and functionalities.
- Conducting unit testing, guaranteeing the delivery of high-quality and reliable solutions to clients.
- Troubleshooting and resolving reported issues, consistently meeting queries in a timely manner.
- Recommending changes to improve established Java application processes, enhancing overall system efficiency.
- Collaborating closely with cross-functional teams of developers and QA engineers to analyze, design, and implement new projects, ensuring the efficient functioning of critical applications for the delivery of a scalable and secure solution.
- Implementing the RESTful APIs for seamless communication between the front-end and back-end systems.
- Integrating the third-party payment gateways, ensuring smooth financial transactions and adherence to security standards.
- Conducting code reviews and providing mentorship to junior developers, improving overall team efficiency. Implemented automated testing using JUnit, resulting in a **20% reduction in post-release defects**.

Education

- **2012 - 2017: Bachelor of Engineering** from Dr. Babasaheb Ambedkar Marathwada University, Maharashtra
- **2011 - 2012: Higher Secondary Education** from Maharashtra State Board, Aurangabad
- **2009 - 2010: Senior Secondary Education** from Maharashtra State Board, Aurangabad

Projects Undertaken

Title: Koozie Group

Description: Developed a comprehensive Promotional Products Management System for Koozie Group, one of the largest suppliers in the promotional products industry. The system, built using Java, Spring Boot, and Hibernate, enables efficient design, creation, and production of reliable products. Implemented Spring Security for robust access control, Docker for containerization, and AWS for scalable hosting. Utilized JUnit for testing, GitHub for version control, and integrated various technologies like SQL, Oracle, and JIRA. The system also includes Restful API for seamless integration and a user-friendly front end with HTML, CSS, JavaScript, and Angular.

Title: NBCUniversal

Description: Contributed to the development of a Media and Entertainment Platform for NBCUniversal Media, LLC. The platform, based on Java technologies, serves as a robust foundation for NBCUniversal's involvement in the media and entertainment industry. The project involved intricate design and implementation to cater to the diverse needs of a multinational mass media corporation. Collaboration with various teams ensured the successful deployment and ongoing maintenance of the platform at 30 Rockefeller Plaza in Midtown Manhattan.

Title: UBS Group AG

Description: Played a key role in the development of a Financial Services Management System for UBS Group AG. The system, built on Java, Spring, and Hibernate, provides comprehensive financial services globally. Co-headquartered in Zürich and Basel, the project involved addressing complex requirements of a multinational investment bank. Implemented secure and scalable solutions, leveraging technologies like Spring Boot and Docker. The system maintains a strong presence in major financial centers and contributes to UBS Group AG's status as the largest Swiss banking institution and the world's largest private bank.

Personal Details

Date of Birth: 20th November 1994

Languages Known: English and Hindi

Address: Ambikanagar, Mukundwadi, Cidco N 2, Aurangabad – 431001, Maharashtra, India
