PROFILE SUMMARY

Over 10+ years of designing and development experience in application development and specialization in Java based web technologies. Having exposure and experience over design concepts. Expertise and experience in both Agile Safe and Waterfall model software development techniques. Having string domain knowledge on Banking and Market Data Reference. Good follower of engineering practices such as TTD, BDD, CI/CD. Passionate learner and enthusiastic in learning and adapting to new technologies and framework. Good communication skills and strong believer in teamwork. Active participant in requirement analysis, and estimation, slicing backlog and sprint planning and providing technical and architectural solutions to complex problems.

WORK EXPERIENCE

Capco Technologies (July 2017 - Present)

Natwest

Bankline Direct Digital application helps banks in processing different types of payments such as CHAPS, International and enquire Payments Transaction status.

Track payment failures and retry failed payments and report generation.

Generate Camt54 advice for different channels like Swift, B2b etc. and data archival helps banks in Managing customer Accounts and Agreements.

- Involved in Requirements gathering, Design, Development, Integration Debugging and deployment of services.
- Migration of services from PCF to PNF
- Worked extensively on API Decomposition with help of Camunda BPM
- **Technology Used:** Java 8, Spring Boot, Micro Services, AWS, Kafka

FIS IT Delivery Process

IT delivery process is a ticketing tool to help with IT support inquiries. You can raise requests that deal with Event & Incident Management, Connectivity and Change Management. It offers Search and view self-help guides, commenting on the self-help guides, submit a new request support ticket, track the status of the tickets, Find a local help desk phone number.

Key Responsibility Areas

- Requirement Analysis
- Designing and developing angular modules or components for the incident and connectivity flows.
- **Technology Used:** Angular 8, Node JS, Mongo DB

Siam Commercial Bank - iPlan

iPad app, a tool that helps branch staff hold structured, more personal customer conversations on the go. The solution guides dialogues and educates, digitally recognizing and synthesizing consumers' needs

SKILLS

TECHNICAL SKILLS

- JAVA 8
- Spring Core, MVC, Security
- Spring Boot
- Spring JPA
- Angular
- JavaScript/CSS/HTML
- CAMUNDA BPMN

Microservices

- Rest API, Microservices
- Spring Cloud
- JWT

Cloud

- AWS, PCF, Azure
- Apache Kafka
- Docker /Kubernetes

Database

- MySQL, SQL Server, Oracle, MongoDB

Other Tools

- Maven, Swagger
- Apache Camel
- Backbase 5.6, 5.5
- GIT, Team City, JIRA
- Postman
- Sonar Qube

FUNCTIONAL SKILLS

- Banking & Financial Applications
- Insurance
- Healthcare

. At the same time, it helps agents make recommendations and offers advice on the best policy options. To speed and facilitate decision-making, it also streamlines the application process and provides custom quotes.

Key Responsibility Areas

- Integration of rest services using Apache camel, Third party APIs integration
- Payment module using QR code. It included QR code generations, OTP, Active MQ Listener
- Designing Database structures for admin portal modules
- Deployment and debugging on Linux servers
- Application Support and Unit Testing
- Working in Agile Practice.
- **Technology Used:** JAVA 8, Spring, Spring Security, Backbase, Angular JS 1.x

Achievements:

- 19 consecutive successful high quality E2E-deliveries
- Work closely with client for entire period

ITC Infotech Ltd India (July 2016 – June 2017)

Sutter Health Portal

- It is a one-point solution for all the health-related problems and allows to connect with the practitioners online with best user friendly experience.

Role: Backend Developer

Key Responsibility Areas

- Backend Services Integration using Rest API
- Development of widgets for the web application using Angular JS
- Symptom checker API integration and Token generation
- REST call for Token generation
- **Technology Used:** Angular JS 1.x, Java, Eclipse, REST API, Apache Camel, Spring, SQL Server, Maven

Cognizant Technology Solutions (Dec 2013 – July 2016)

Barclays - DragonPass Traveller Portal

- It is a responsive web application which allows the users to utilize various benefits provided by the company during travelling, like lounge, spa, nail bars. It has two types of users: users and admin. Users can use the functionality like “Near me” to track all the benefits near to their location.

Role: Full Stack Developer

Key Responsibility Areas

- Development of widgets for the web application using Angular JS
- Inline editable widget creation
- Use of targeting and configure it for more than one client
- Calling Rest camel services
- **Technology Used:** Angular JS 1.x, Java 1.7, Apache Camel

Halifax - Halifax Insurance Portal

- It's a web application available in desktop as well as mobile view which allows users to go through the various key benefits provided by the company. It enables the users to report different breakdowns, set their reminders and what are the benefits they are covered for per their age. It also provides the functionality of search and google analytics to the admin portal.

Role: Full Stack Developer

Key Responsibility Areas

- Development of widgets for the web application using Angular JS
- Calling Rest camel services
- **Technology Used:** Angular JS 1.x, Java 1.7, Apache Camel

Achievements: Received reward for driving excellence

EDUCATION

- B. Tech in Computer Science & Engineering from Indrapastha University, Delhi (73%) - 2013
- 12th From St. Joseph Public School (68%) - 2008
- 10th From Kendriya Vidyalaya (82%) -2006

HIGHLIGHTS

- Migration of services to PCF to PNF
- Customer onboarding journey using MATLS+OAUTH.
- Cost saving: By optimizing the operating model, SCB iPlan app enabled the bank to save money on manual process overheads (i.e. removal of paper-based process)
iPlan redefined the target customer journey and sales engagement model with business

TRAINING AND CERTIFICATIONS

- Scrum Certification for Java Development
- Certification for Backbase 5.6 Backend Developer
