## Employment

<b>Sep 2018 – Till Date</b>	Worked as a ' <b>Module Lead</b> ' in Tech Mahindra Limited. Hinjewadi Ph.3, Pune.
<b>Nov 2012 – Sep 2018</b>	Worked as a ' <b>Senior Software Engineer</b> ' in Optra Technologies Pvt. Ltd. Pune.

## Work History

### Tech Mahindra Ltd

**Module Lead, Sep 2018 – Till Date**

**Project Name:** Ingram Micro (Duration: 2 year)

**Project Overview:** Ingram Micro helps businesses fully realize the promise of technology™—helping them maximize the value of the technology that they make, sell or use. With its vast global infrastructure and focus on cloud, advanced and specialty technology solutions, in addition to mobility and commercial/consumer technologies, Ingram Micro enables business partners to operate more efficiently and successfully in the markets they serve.

#### Responsibilities:

- Worked with business analysts to understand their business models and goals.
- Responsible for managing the complete Application User Interface part.
- Implemented project using Agile SCRUM methodology. Involved in daily stand-up meetings, sprint showcase and sprint retrospective.
- Developing web pages using **Micro Front-end architecture**
- Gathering requirements from clients and had discussion related to daily status with clients and getting new tasks regarding future development work from client.
- Work closely with Design and testing team to create UI designs that not only push the boundaries of UI design, but which can be implemented on schedule and with given resources

- Closely worked with back-end developers to optimize existing Web technology and create the best possible user experience
- Also Work with Business development team and participant services to develop user interface designs that meet or exceed market needs and business objectives.
- Designed and developed the application using React Js along with HTML5, CSS3, Type Script, Java Script, Material UI.
- Implemented Routers & History in Single Page App (SPA).
- Used JSON for data exchange between client and server.
- Used JIRA to keep track of bugs to reduce downtime, increase productivity, and improve communication.
- Used Bitbucket for version control and JIRA for defect tracking.
- Experience in CSS pixel-level layout, Consistency with browsers, Version and Platform Independence.
- Extensively call RESTful app in our web application.
- Helped team members for resolving critical issues and to meet project deadlines
- Work in the agile process with daily scrums and sprints.

**Environment:** Micro frontend concepts, React Js, Material UI, HTML5, CSS3, jQuery, JavaScript, Typescript, JSON, DOM, Agile, REST Services and GIT

**Project Name:** Lease Management and payment Systems (AT&T) (*Duration: 1 year*)

**Project Overview:** LMPS is a primary system to Manage the Mobility cell Site Leases (Tower, Ground, Equipment etc.). These Leases are account Payable and receivables in nature. This includes lease payments, amendments, cost-share agreements, access agreements, colocation fees or COW fees (Cell on Wheels).

#### **Responsibilities:**

- Worked with business analysts to understand their business models and goals.
- Responsible for managing the complete Application User Interface part.
- Gathering requirements from clients and had discussion related to daily status with client and getting new task regarding future development work from client.
- Work closely with Design and testing team to create UI designs that not only push the boundaries of UI design, but which can be implemented on schedule and with given resources
- Closely worked with back-end developers to optimize existing Web technology and create the best possible user experience
- Also Work with Business development team and participant services to develop user interface designs that meet or exceed market needs and business objectives.
- Designed and developed the application using Angular 6 framework along with HTML5, CSS3, Type Script, Java Script, Bootstrap, Node.js, NPM, Mongo DB.
- Used Node JS, Angular JS and MVC Frameworks in the development of web applications.
- Implemented Routers & History in Single Page App (SPA).
- Used JSON for data exchange between client and server.
- Used JIRA to keep track of bugs to reduce downtime, increase productivity, and improve communication.
- Used SVN for version control and JIRA for defect tracking.
- Experience in CSS pixel-level layout, Consistency with browsers, Version and Platform Independence.
- Extensively call RESTful app in our web application.
- Helped team members for resolving critical issues and to meet project deadlines
- Work in the agile process with daily scrums and sprints.

**Environment:** Angular 8, Bootstrap, HTML5, CSS3, jQuery, JavaScript, Typescript, LESS, JSON, DOM, Agile, REST Services and GIT

**Project Name:** YouCoach (AT&T) (*Duration: 1 year*)

**Project Overview:** YouCoach is central visualization and training and tool to manage the performance and skills of AT&T field technicians. AT&T Managers can view and assess the performance and skills of their technicians through metrics configured as numeric values and assign/recommend training courses to improve their expertise. AT&T Technicians can view their performance scores and the courses assigned to them. Then you can also complete the training with this tool. The systems also can assign trainings and courses to the technicians automatically based on an in-built set of rules created by human experts.

**Responsibilities:**

- Understanding requirement and analysis
- Responsible for managing the complete Application User Interface part individually.
- Work closely with Development and testing team to create UI designs that not only push the boundaries of UI design, but which can be implemented on schedule and with given resources
- Also Work with Business development team and participant services to develop user interface designs that meet or exceed market needs and business objectives.
- Gathering requirements from clients and had discussion related to daily status with client and getting new task regarding future development work from client.
- Developed client side drop down menus, search bars and drop-down toggles using Twitter-Bootstrap.
- Used JSON for data exchange between client and server.
- Created Responsive Web Design using Bootstrap.
- Developed cross-browser/platform HTML 4/5, CSS 3, and JavaScript to match design specs for complex page layouts while adhering to code standards.
- Used JIRA to keep track of bugs to reduce downtime, increase productivity, and improve communication.
- Used Angular 6 as framework to create a Single Page Application (SPA) which can bind data to specific views and synchronize data with server using Sass, LESS, Bootstrap, Angular.
- Helped team members for resolving critical issues and to meet project deadlines
- Experience in CSS pixel-level layout, Consistency with browsers, Version and Platform Independence.
- Extensively call RESTful app in our web application.

**Environment:** Angular 6, Bootstrap, HTML5, CSS3, jQuery, JavaScript, Typescript, SASS, JSON, DOM, Agile, REST Services and GIT

**Project Name:** Hinjewadi Cab App (Tech Mahindra Internal Project) (*Duration: 6 months*)

**Project Overview:** Application related for digitalizing the cab service provided by Tech Mahindra to its employees.

**Responsibilities:**

- Worked with business analysts to understand their business models and goals.
- Worked on escalated project and resolved major issues
- Responsible for managing the complete Application User Interface part individually.
- Work closely with Development and testing team to create UI designs that not only push the boundaries of UI design, but which can be implemented on schedule and with given resources
- Also Work with Business development team and participant services to develop user interface designs that meet or exceed market needs and business objectives.
- Implemented Routers & History in Single Page App (SPA).
- Developed client side drop down menus, search bars and drop-down toggles using Twitter-Bootstrap.
- Used JSON for data exchange between client and server.
- Created Responsive Web Design using Bootstrap.

- Developed cross-browser/platform HTML 4/5, CSS 3, and JavaScript to match design specs for complex page layouts while adhering to code standards.
- Used JIRA to keep track of bugs to reduce downtime, increase productivity, and improve communication.
- Used SVN for version control and JIRA for defect tracking.
- Experience in CSS pixel-level layout, Consistency with browsers, Version and Platform Independence.
- Helped team members for resolving critical issues and to meet project deadlines
- Extensively call RESTful app in our web application.

**Environment:** Angular 4, Bootstrap, HTML5, CSS3, jQuery, JavaScript, Typescript, LESS, JSON, DOM, Agile, REST Services and GIT

## Optra Technologies

**Senior software engineer, Nov 2012 – Nov 2018**

Worked in various projects as a Senior software engineer engaged in following activities.

- Understanding requirement and analysis
- Implemented page designs in standards-compliant dynamic HTML and CSS
- Responsible for managing the complete Application User Interface part individually.
- Highly appreciated by Customer for the outstanding contribution for RWD.
- Worked on escalated project and resolved major issues
- Helped team members for resolving critical issues and to meet project deadlines
- Work closely with Development team in project to create UI and code refactoring
- Created clean, precise browser-compatible code
- Work closely with Development and testing team to create UI designs that not only push the boundaries of UI design, but which can be implemented on schedule and with given resources

**Environment:** HTML5, CSS3, jQuery, JavaScript, Typescript, LESS, XML, DOM, Angular 4, Bootstrap, REST Services.

**Project Name:** Shiftgen (*Duration: 8 months*)

**Project Overview:** ShiftGen is a workforce management tool for any business that requires shift-based scheduling for workers. Accessible through any browser, ShiftGen provides roster management, scheduling, schedule management, messaging, time and attendance and payroll management solutions. The application is vertical agnostic. Full cloud deployment of all functionalities facilitates access for users and administrators via any web-enabled device. The administrator can manage multiple sites across any business.

### Responsibilities:

- Worked with business analysts to understand their business models and goals.
- Implemented page designs in standards-compliant dynamic HTML and CSS
- Responsible for managing the complete Application User Interface part individually.
- Work closely with the Design and testing team to create UI designs that not only push the boundaries of UI design, but which can be implemented on schedule and with given resources.
- Created Responsive Web Design using Bootstrap.
- Developed cross-browser/platform HTML 4/5, CSS 3, and JavaScript to match design specs for complex page layouts while adhering to code standards.
- Experience in CSS pixel-level layout, Consistency with browsers, Version and Platform Independence.
- Helped team members for resolving critical issues and to meet project deadlines

**Environment:** Angular4, Bootstrap3, HTML5, CSS3, jQuery, JavaScript

**Project Name:** Optra Scan (*Duration:12 months*)

**Project Overview:** Optra Scan Digital Pathology Image Management System delivers a web-based system for effective viewing, annotation, management and search of high-resolution digital images, along with relevant slide information, as an integrated element of the workflow in a digitally enabled pathology laboratory.

**Responsibilities:**

- Worked with business analysts to understand their business models and goals.
- Implemented page designs in standards-compliant dynamic HTML and CSS
- Responsible for managing the complete Application User Interface part individually.
- Work closely with the Design and testing team to create UI designs that not only push the boundaries of UI design, but which can be implemented on schedule and with given resources.
