Analytical, accomplished and Automation Tester with over 5.5 years of experience in multifaceted roles requiring project management and solutions architecture. Motivated and eager to advance in my career with a growth-oriented and technically-advanced organization

SKILLS

Selenium Webdriver | Functional Testing | Agile | Bit Bucket | JIRA XRAY | Cucumber | Behavior Driven Development | Gherkin | Automation Testing | Regression Testing | API Testing | GIT | Jenkins | BrowserStack | Appli Tool | Postman | HTML | CSS

EMPLOYMENT HISTORY

Consultant ► Genpact, Bangalore

Feb 2022 - Present

- Collaborated with the Centre of Excellence Team to drive continuous improvement and innovation, resulting in the
 enhancement of features within the Selenium-driven framework, optimizing test automation processes and elevating
 overall software quality
- Worked in a team to Integrate the Cucumber Framework with the Test Management tool
- Contributed significantly to a collaborative team effort, spearheading the design and development of the front end
 using React JS, resulting in an intuitive and dynamic user experience that elevated the overall quality of the
 application
- Actively worked on JIRA XRAY, Bit Bucket, Jenkins and JIRA confluence

Associate ► Cognizant Technology Solutions, Kolkata

Feb 2018 - Feb 2022

- Worked in a team to design an automated testing script using Behavioral Driven Development following POM methodology and Gherkin to write test cases with Cucumber reporting that performs end-to-end testing on a web application and performs end to end cross-browser testing (Browser Stack & Desktop Browser) and Applitools for screenshot validation on a web application
- Has been single-handedly working on an automation project from scratch which follows Agile Methodology
- Worked in a team to design a Chat Bot called "Ask Jia" which is used to assist testers with their JIRA-related queries and provide them with an interactive platform for performing their daily Test Management Activities
- Creating test plans and cucumber tests in Jira/Microsoft Azure Devops corresponding to the story under test
- Guiding team members in Automation activities and code review
- Responsible for coordinating with the offshore team for the execution of test cases and test management
- POC for organizing various training sessions on the trending technologies

PROJECTS

Consultant (Genpact)

In a dynamic software development environment, I led the implementation of a new enhancement for our Selenium WebDriver Cucumber-based framework, effectively translating user stories from Jira Xray into actionable development tasks. Collaborating with a skilled team, we streamlined the process by seamlessly integrating code changes to BitBucket and diligently managing to pull requests for approvals

Furthermore, I actively contributed to the design and development of the front end for our Test Management Dashboard, harnessing the power of React JS. My responsibilities entailed architecting an intuitive and visually appealing user interface, enhancing the overall functionality and user experience. Throughout the project, I maintained a strong focus on quality assurance and adherence to best practices, ensuring a robust and scalable solution.

To enhance collaboration and knowledge sharing, I took the initiative to create comprehensive Confluence documentation, meticulously documenting the specific changes made to the framework and Test Management Dashboard. This knowledge repository facilitated the efficient onboarding of new team members and provided valuable insights for future iterations.

Automation Testing (Cognizant Technology Solutions)

Test Case and test scenarios in Gherkin Format with Browser Stack used to test in multiple Devices and Applitools for Screenshot Validation Creating regression test plan and adding test cases to the suite, regularly updating the suite and configuring scheduled run through Jenkins Maintaining the Source code with daily check-in, and merging to the master branch using Git commands. Attending daily scrum calls, Planning calls, Grooming calls and other sprint-related calls.

Functional Testing (Cognizant Technology Solutions)

Designing the Test approach, to validate the requirements. Generate test cases after the test approach has been approved. Carry out Progression and Regression testing using various tools and application, database validation. Defect logging in JIRA and Microsoft Azure DevOps and follow up Creating and sending daily status report to stakeholders.

EDUCATION	
B Tech ► Lovely Professional University, Jalandhar CGPA: 8.63	Aug 2013 - May 2017
HSC ► Vikash Residential School, Bargarh 79.2%	May 2011 - May 2013
SSC ► Siksha Niketan, Brajrajnagar 71.71%	May 2010 - May 2011
