Projects

Senior Angular Developer at Subex

Bengaluru
Present

At subex am currently working as fullstack developer from last one year, before am working as Frontend developer. The project am working is a telcom project which deals with fraud management called "HyperSense".

The module am worked are
"**SysAdmin**" - Admin module which consist of all user registration.
common settings for all the user.
Aduit Logs - Capturing the logs for all the user and API's call.
PAS - "Process automation studio"
This module is responsible for automating the case creation. this will create a case when there could be possibility of breaching the set rules, from then to close the case may involve so many steps few to mention is case analysis, case closure.

As a senior developer here at subex my daily tasks are,
- Leading 5 members team.
- Grooming the juniors.
- Taking the daily standups and reporting to managers.
- Collecting the requirements from PLM and work closely to deliver on time.
- Involved in development as well, using tech stack like Angular, java, typescript and spring. Using GIT for versioning the codebase.
- Using CI/CD process to test and deliver the new features.
- Doing code review for the new features.
- Taking care of feature estimation to sprint delivery, am responsible for the on time delivery of the features committed for the sprint.
- Involving in improving the performance of the application.
- Handled many complex features and very successful in anticipating the risk factor. This helped me in delivering the features on time.

Associate consultant at Capgemini

Bengaluru
10/2018 - 09/2021

Celcom

- As a Web Developer at Capgemini, I have been responsible for the development and maintenance of web applications using JavaScript, CSS, HTML, and other programming languages. Working with a team of developers, we create user-friendly and visually appealing interfaces that deliver exceptional user experiences. Additionally, I am skilled in utilizing angular efficient and effective in web development.
- Client Side Programming, Front End Web Development, Responsive Web Design and User Interface Design.
  Very strong knowledge to write code in Front end and Client side programming languages.
- Involving in client meeting directly to understand the requirements.
- Involving in the estimation of user stories.
- Directly responsible for on time deliverables.
- Playing the major role to solving the bugs in all the areas of front end side.
- implemented many POC's before starting the complex features.
- Recognized by the client for the "ultimate contributor" award for my contribution of the project.

Front end Developer at PaNa infotech Pvt Ltd

Bengaluru
07/2017 - 10/2018

Advokit

- Created a reusable component library for the web application using Angular Material, resulting in faster development time for new features.
- Understanding the requirements through documents and oral communication with the manager.
- Developing CRUD operations, manipulation JSON formatted data, client side validations and make http calls with using Angular JS
- Developing responsive UI screens based on specifications provided by UX team with using HTML5,CSS3 and Bootstrap framework.

Front end Developer at DigiTigers

Bengaluru
05/2016 - 05/2016

- During my time as a Front end developer at DigiTigers, I was actively involved in the development of user interface components for various web applications using HTML, CSS, JavaScript.
- My role included collaborating with the design and back-end teams to ensure seamless integration of front-end and back-end functionalities, resulting in visually appealing and highly functional web sites.
