Pune University

Work Experience

May 2022 - Present

Technical Project Manager

ETP International

- Orchestrated ERP and Custom integration with Retail Point of Sale and e-commerce domain
- Defined the solution roadmap and identified key stakeholders
- Led cross-functional projects, maintaining schedule and keeping cost variance below 20%
- Executed process automation projects, yielding a significant cost saving of 30%
- Planned resource allocation and forecasted revenue on a monthly basis

Jan 2008 - May 2022

Senior Manager

Capgemini Technology Services India Limited

- Lead digital transformation initiatives for 10+ engagements in multiple business verticals. Resulting 70% effort saving through automation.
- Obtain TOGAF certification as an Enterprise Architect, specializing in techno-commercial approach and hands-on expertise in Core Java, J2EE, Integration, and Data Analysis.

- Serve as the Product Owner for Java-based BI solutions and spearhead quality management solutions in the test automation domain.
- Define solution roadmaps tailored to account and project-specific needs, driving the design and development of new solution features through POCs, POVs, and R&D.
- Take end-to-end ownership of solution building, customization, and implementation, ensuring seamless delivery.
- Customize BI applications in over 10 accounts within healthcare, consumer products, and telecom domains, resulting in an average effort saving of 75% through transformative endeavors.
- Upgrade legacy solutions to align with the latest technologies and trends, enhancing performance and functionality.
- Proficiently integrate various management tools including JIRA, HP-ALM, Zephyr, QMetry, and TestRail with technology products and custom solutions.
- Mentor and build competencies within teams, facilitating skill development in technical and functional domains while adeptly enabling the ramp-up of teams in new technologies and paradigms.
- Apply expertise in both Scrum methodology and waterfall, leading scrum planning, artifacts, and implementation.

Projects

6 Months

CRM Integration with Point of Sale

ETP is a point of sale enabler for the largest Speciality Stores in PH. Unified view of Customers was missing. Business was unable to map the customer journey across channels creating siloed views of offline stores and e-commerce. CRM Integration was a first step towards multi channel enablement for the retail platform. The orders placed in e-commerce channel were to be processed in Point of Sale. This helped to create Unified view of Customers and Orders in online and physical channels.

12 Months

ERP Integration with Point of Sale (POS)

ETP is a preferred POS partner at Largest Retailer in Indonesia. This integration with ERP system was a first step towards the enablement of POS in retail stores. It includes the Master data migration from Oracler RMS to store systems and Transaction data updation back to RMS. Promotion execution enablement by accurately mapping Merchandising Categories from RMS to PoS. Monitor the overall development to achieve the ontime delivery. Project Metrics 50% improvement in cycle time achieved 70% faster Transaction processing

24 Months

Data Visualization and Data Analysis

Digital Dashboard generation application that integrates with different ALM tools such as JIRA, HP-ALM, QMetry, TestRail and provides automated dashboards using data fetched from them. Power BI enabled reporting framework provides delivery , operations and monitoring based metrics

9 Months

Delivery Operations Dashboard

Working as a Solution Architect and Data scientist

- Took the technical and functional ownership of strategic initiative that enables unified reporting for 10+ functions and 20+ data sources
- Collaborated with 15 different data custodians within organization
- Responsible for Architecture development and Data analysis and exploration, data cleansing and data transformation and report building
- Developed the solution prototype and guided the development team to build 5 ETL connectors for different data sources

Certification

- TOGAF Certification
- SAFE PMPO
