Bengaluru, Karnataka

Summary

Associate Consultant with experience in backend development and maintaining server-side applications. Proficient in Java, REST API design, and the Spring Boot framework. Hands-on experience with tools like Postman, SOAP UI, and Core Java concepts. Strong problem-solving skills with a focus on building scalable and efficient backend systems.

Experience

Associate Consultant

Datamatics Global Services Limited • Bengaluru, Karnataka   02/2022 - Present

- **Project Title:** FileNet Data Flow

  The project focuses on developing RESTful APIs & Java Utilities to enable uploading, retrieving, modifying, and viewing documents in IBM FileNet, a comprehensive enterprise content management system. The APIs are designed to streamline document management processes, ensuring secure and efficient file storage, retrieval, and modification capabilities for end-users. The system integrates with FileNet to handle large volumes of documents, providing seamless interaction with the platform's robust content management features.

- **Role:** Java Backend Developer & Team Lead

- **Responsibilities:**

  Worked as a Java Backend Developer & team lead, I have developed and maintained backend services using Java and Spring Boot, designed and implemented RESTful APIs, operated databases such as BD2, oracle. I collaborated with cross-functional teams to optimize application performance, ensured code quality through unit testing using SOAPUI and Postman tools, and used Git for version control. Additionally, I participated in continuous integration and delivery practices and documented key backend processes and APIs to support ongoing development.

  Worked as a Team Lead to deliver high-quality web applications, ensuring timely completion of projects. Coordinated project planning, task assignments, and progress tracking, ensuring smooth workflow and adherence to deadlines. Acted as the primary point of contact for clients, gathering requirements and providing regular project updates.

System Engineer

Tata Consultancy Services • Bengaluru, Karnataka   07/2018 - 02/2022

- **Project Title:** This project involves developing a network element interface that interacts with external APIs by sending requests and processing the received responses. Additionally, Python scripts are being developed to implement optimization algorithms, enhancing the performance and efficiency of network operations. The project focuses on creating a robust interface for seamless API communication and automating optimization processes through algorithmic solutions.

- **Role:** Backend Developer

- **Responsibilities:** Worked as backend developer in banking and telecom domain. I was responsible for developing and maintaining client-side applications network element interface using http client and jersey client. Also used python scripting for excel operations to implement optimization algorithms and have experience in Agile development methodology.

Skills

Programming Languages: C,C++,Java (Core Java, OOP Concepts), Frameworks: Spring Boot, Web Services: REST, SOAP, Tools & Platforms: Postman, SOAP UI, Jmeter, Logging: Log4j2 Databases: DB2, Oracle , Version Control: Git, Bit bucket

Education

Computer Science and Engineering

Siddaganga Institute Of Technology • Tumkur, Karnataka   08/2018

I have completed by engineering in Computer Science with 8.72 CGPA (79.70%).

PCMB

Hanchinmani Pre university Independent Science College • Dharwad, Karnataka   05/2014

I have completed my PUC in PCMB with 83.50%

Languages

English, Hindi, Kannada
