Anil Rathod   **Email-ID: rathodanil09@gmail.com**

Phone No: (+91) 9632546020

OBJECTIVE:

✔ Technical professional with 8+ years' experience in the area of software development & programming in J2EE environment and web technology.
✔ Adapt in end-to-end development of software products from requirement analysis to Requirement study, designing, coding, testing, debugging, and implementation.
✔ Excellent analytical, communication skills and ability to learn and adapt quickly with new tools and technologies.

PROFESSIONAL SUMMARY:

✔ Hands on experience to develop Applications using JDK 8, Spring Boot, Microservices ,Hibernate JPA and Rest APIs.
✔ Hands on Experience of writing SQL Queries on MYSQL Database.
✔ Hands on experience in Web Services Rest API development in Postman
✔ Hands on experience to create procedures on PL/SQL.
✔ Proficient in development environments such as Eclipse and Maven, Gradle, IntelliJ, STS, IDS web server like Tomcat
✔ Hands on experience with spring security to secure the application using OIDC protocol(Oauth 2.0)
✔ Advanced knowledge of migrating the on-premises servers(applications) to Azure cloud.
✔ Cohesive team player, having strong analytical, problem solving and interpersonal skills.

WORK EXPERIENCE:

▪ From July 12th 2021 - till date working as Team Lead at AXA Global services.

▪ Software Developer in Cognizant **Technology Solutions**,
From March 21st 2018 – July 10th 2021.

▪ Software Engineer in **Cast Software**, Bangalore,
From Sept 2016 – March 16th 2018.

SKILL SET:

Programming Languages	: Java, J2EE
Frameworks	: Microservices, Spring boot, Spring Cloud Spring Core, Spring MVC, Azure Cloud, Spring Data, Hibernate, JPA, Apache Kafka
Web Technologies	: HTML, CSS, JavaScript, JSP,JSF
Software/Tools	: Eclipse, STS Putty, Winscp, SSRS reporting tool
Application Build Tool	: Maven
Web servers	: Apache Tomcat Server, JBoss server
Database	: MYSQL,ORACLE
API	: REST API

- ✔ Working as a Team lead for Casenet Development team to migrate the Legacy application into Micro Services.
- ✔ Working on Casenet application to enhances and handles the product incidents based on business and customer requirement.
- ✔ Key player in migrating 22 servers from on premises to Azure cloud.
- ✔ Successfully migrated authentication of casenet application from PassAxa to OneAccount(Password less authentication).
- ✔ Developed the reports based on customer requirement using SSRS reporting tool.
- ✔ Developed the queries to meet GDPR requirements of data sharing in casenet.
- ✔ Debugging java, java script to analyse and fix the bugs following defect tracking mechanism.
- ✔ Requirement Analysis, current state code analysis, preparing estimation, design document based on the requirement.
- ✔ Preparing test cases, performing unit testing and integration testing.
- ✔ Preparing the local code base to merge with actual branch in GIT and support deploying the code in managed environments.
- ✔ Deployment activities in QA and Development Servers (incl. DR Environment).

PROJECT OVERVIEW:

In AXA Global Services

Project   : CASENET
Customer   : AXA
Period   : July 2021 to till date
Programming Methodology: Agile model

Description
AXA Global Services is a France based business and insurance company that also provides investment management and other financial services.

Project Title #1	CASENET
Client	**AXA**
Work Place	**AXA Global Services**
Responsibility	✔ Working on the product enhancement based business requirements. ✔ Pentest remediations ✔ Key player in migrating 22 servers from on premises to Azure cloud. ✔ Successfully migrated authentication of casenet application from PassAxa to OneAccount(Password less authentication). ✔ Developed the reports bases on customer requirements with the help of SSRS reporting tool. ✔ Developed the purging queries to meet GDPR requirements of data sharing. ✔ Lead the team of 4 by providing the right approach and guidance to handle casenet related incidents.

In Cognizant Technology Solution

Project   : INTUIT BANK STATEMENT AND RTB
Customer   : Intuit
Period   : July 2020 to till date
Programming Methodology: Agile model

Description
Intuit Inc. is an American business and financial software company that develops and sells financial, accounting, and tax preparation software and related services for small businesses, accountants, and individuals.

Project Title #1	INTUIT BANK STATEMENT AND RTB
Client	**Intuit**
Work Place	**Cognizant Technology Solutions**
Responsibility	✔ Developed code to download the statement PDF for respective account ✔ Provided Level 4 support to internal business users.

In Cognizant Technology Solution

Project   : Agilent-AMS Consolidation-MAY
Customer   : Agilent
Period   : July 2019 to till date
Programming Methodology: Agile model

Description
MEIDAS is a web-based application created to simplify H.R. processes and provide easy access and up-to-date H.R. information to both managers and employees. MEIDAS encompasses a set of functions that enable employees to read as well as update selected personal data. It allows managers to perform Performance Evaluation and Other updates with Active Approval. Managers also have access to various reports showing information about employees in their department.

Project Title #1	Agilent-AMS Consolidation
Client	**Agilent**
Work Place	**Cognizant Technology Solutions**
Responsibility	✔ Provide Level 3 support to internal business users. ✔ End-to-End Incident tracking and client follow-up. ✔ Analysed and worked on priority 2,3 4 tickets that were raised by the end users using the Application(Meidas).

	✔ Closely worked with business in managing day to day issues, resolve user queries

Project   : Merchant Reporting – ClientLine Reporting
Customer   : Fiserv
Period   : April 2018 to June 2019

Programming Methodology: Agile model

Description
- The purpose of ClientLine Reporting application is to give merchants the ability to view the reports(Merchant's Transactions).
- The Application gives merchants the flexibility to customize the reports on their own transaction data maintained by the application DB using the frontend of Application and generate report either by scheduling or running interactively.

Project Title #1	ClientLine Reporting
Client	**Fiserv**
Work Place	**Cognizant Technology Solutions**
Reporting Tool	**Cognos 11(IBM)**
Project Details	Merchant Reporting application area comprises of multiple reporting platforms for merchants like ClientLine 2.0, Payment Tax Manager etc. which they can use to view their transactions, authorizations, chargebacks and other details. The back-end database comprises of data from multiple platforms. As part of security compliance, the data(full card number) in these tables are masked by using the Voltage encryption technique.
Responsibility	✔ Analysing the requirement – Waterfall model of application development is involved wherein the requirement is analysed in depth from Jira Stories. ✔ Working on java code debugging/enhancements. ✔ Active monitoring of the Scheduled Jobs (on a daily basis) and Production Server logs. ✔ Fixing the Post Production defects (Incidents) and defects leaked to QA (if any).

Cast Software.

Project   : Professional Services
Customer   : ATT, Broadridge, Bank of melon.
Period   : April 2016 to March 2018

Programming Methodology: Waterfall model

Product Description:

CAST is an independent software vendor that is a pioneer and world leader in Software Analysis and Measurement (SAM). CAST provides the most advanced technology in the world to capture and quantify the reliability, security, complexity and size of business applications. It introduces fact-based transparency into software asset management, application development, maintenance and sourcing to transform it into a management discipline. More than 250 companies across all industry sectors and geographies rely on CAST to prevent business disruption and build a transparent dialogue with their service providers. CAST is also an integral part of software delivery and maintenance at the world's leading IT service providers and independent software vendors.

Project Title #1	Professional Services
Client	ATT ,Broadridge ,Bank of melon
Work Place	Cast Software
Responsibility	✔ Using a consultative approach, identify the actual client business and technical requirements, analyze the processes as-is and redesign the to-be, enabling the client to cope with its' change management needs ✔ Design and roll-out the measurement Center of Excellence, in conjunction with the client or the preferred partners, granting the best scalability, integration and efficiency of the measurement environment ✔ Build a trusted relationship with all the client's stakeholder in order to grant the value delivery

EDUCATIONAL QUALIFICATIONS:

✔ MTech in Computer Networks from CMR Institute of Technology Bangalore in the year 2015.
✔ B.E(Computer Science and Engineering) from Basaveshwar Engineering College , Bagalkote in the year 2013.

PERSONAL DETAILS:

Gender: Male

Date of Birth: 01 June, 1990

Hobbies: Learning new technologies, Playing football, Reading novels, playing cricket.

Father's Name: Babu

Marital Status: Married

Nationality: Indian

Languages Known: Proficient in Kannada, Hindi and English

Declaration:

I hereby declare that the information furnished above is true to the best of my knowledge.

(Anil Rathod)
