PROFESSIONAL SUMMARY

- I am a passionate SharePoint and Power Platform Developer with emphasis on SharePoint (Online Out of the Box feature and SPFX development) and integration within the Microsoft O365 ecosystem. I put my analytical and creative thinking to use finding innovative solutions to complex requirements and use best practices to optimize and improve existing solutions utilized on an enterprise level.
- Experience in design, development and delivery of custom web applications using the SharePoint platform, ReactJS, JavaScript, jQuery and HTML5.

TECHNOLOGY EXPERIENCE/SKILL SET

- **Microsoft technologies –** Power Apps, Power Automate, SharePoint Online, Power BI, Power Pages, Power Virtual Agent, SharePoint 2016, SQL, and Office 365.
- **Languages:** HTML, JavaScript, JQUERY, AJAX, CSS, SPFX, ReactJS, ExpressJS.
- **Technologies**: Web API (RESTful services).
- **Tools**: Visual Studio, SharePoint Designer, Git.
- **Markup languages**: Html5
- **Scripting Languages**: JavaScript, jQuery, Ajax
- **Databases**: MySQL(Basics)

WORK EXPERIENCE   Total: 4+ Years

Project: Larsen & Toubro InfoTech Mindtree | Senior Software Developer   April 2023– present
Development | Power Apps, SharePoint O365, Power Automate, Power Virtual Agent, HTML, CSS, Rest API, JavaScript, jQuery, ReactJS and Dataverse.

Responsibilities:
- Developed SharePoint online (SPFX), Power Apps (canvas), Power Automate Flow and Web Services.
- Worked on company's internal web sites for LTIMindtree.
- Developed Responsive Power Apps (canvas) and integrated custom logics to meet the customer requirement.
- Developed custom WebParts and Extensions using ReactJS and No-JavaScript Framework for the SharePoint Online sites and used Office-UI-fabric for WebParts.
- Set up Microsoft Flow (Power Automate) to provide auto-approval, status update and progress features based on predefined criteria and fetched Data from APIs by connecting Flows with custom connectors.
- Developed and deployed ChatBots in SharePoint Online site and Microsoft Teams to provide solutions, updates and resolve basic queries of the Users. This feature helped in increasing the efficiency of the first level of support.
- Developed software applications that helped the clients streamline the process and prevent recurring process that's been done manually, resulting to a productive day-by-day operation.
- Involved in manual testing of the applications and Deployment.

Project: Larsen & Toubro InfoTech | Senior Software Developer   May 2022– April 2023
Development | Power Apps, SharePoint O365, Power Automate, Power Virtual Agent, HTML, CSS, Rest API, JavaScript, jQuery, ReactJS and SQL

Responsibilities:
- Developed Power Apps canvas, Model driven app using Data Verse (CDS), SQL, Power Automate Flow, Forms, SharePoint online and Web Services.
- Worked on Oil & Gas Production and Manufacturing domain websites for US based clients.
- Developed custom WebParts and Extensions using ReactJS and No-JavaScript Framework for the SharePoint Online sites and used Office-UI-fabric for WebParts.
- Set up Microsoft Flow (Power Automate) to provide auto-approval, status update and progress features based on predefined criteria and fetched Data from APIs by connecting Flows with custom connectors.
- Developed and deployed ChatBots in SharePoint Online site and Microsoft Teams to provide solutions, updates and resolve basic queries of the Users. This feature helped in increasing the efficiency of the first level of support.
- Developed software applications that helped the clients streamline the process and prevent recurring process that's been done manually, resulting to a productive day-by-day operation.
- Involved in manual testing of the applications and Deployment.

Project: Tata Consultancy Services | Senior Software Developer   April2020 – May2022
Development |Power Apps, SharePoint O365, Power Automate, Microsoft Streams, HTML, CSS, Hugo Framework, Rest API, JavaScript, jQuery, ReactJS, Adobe Analytics
Responsibilities:
