Organization Experience

Present Company Name: Ericsson Global India Private Ltd.
Duration:1 Year 10 months (from 13 July 2022 to present)

    Here in Ericsson, I'm managing database to managed service business for Ericsson's customers own IT environments. I've got the exposure of both relational and non-relational database management systems, such as MySQL, MariaDB, PostgreSQL and MongoDB, Apache Cassandra DB.

    Few crucial responsibilities are as follow: -
* Automating and tuning database related task like DB installation, configuration etc. on regular basis.
* Optimizations in terms of database config part and slow queries also OS resources.
* Guarantee database availability around the clock with help of clustering or tools like
 HAProxy ,keepallived, Maxscale.
* Upgrade database to latest stable version to utilize the new feature and removing security vulnerabilities.
* Database backup using volume snapshot, MEB Backup, MySQL dump.
* Database growth management using table partitioning, sharding etc.
* Monitoring and analysis of database using monitoring tools like ZABBIX.
* Exposure of AWS, EC2 and RDS & GCP, Kubernetes Engine. That includes infra setup using terraform or UI, security/networking.
