Module: Lead Management, Client Management, Lead Tracking and Analysis, Reporting and Analytics.

Description: Implemented a comprehensive Marketing Management System using Spring Boot and Java 1.8 to streamline lead generation, tracking, and conversion processes. This project aimed to enhance the efficiency of marketing operations by providing a centralized platform for managing leads and clients.

ROLES & RESPONSIBILITIES

- Developed and maintained RESTful web services using Spring Boot, Hibernate and JPA.
- Applied Core Java expertise to ensure the creation and maintenance of high-performance web applications.
- Design and Development of significant projects such as "CareConnect 3.4" and "JD OMNI".
- Managed various modules, including Patient Management, Appointment Scheduling, Billing, and Insurance in CareConnect, and Lead Management, Client Management, Lead Tracking and Analysis, Reporting and Analytics in JD OMNI.
- Implemented robust security measures, integrating Spring Security for securing REST API endpoints.
- Employed JWT Token for authentication and authorization, ensuring a secure application environment.
- Conducted comprehensive integration testing using Postman to validate the reliability and functionality of developed systems.
- Collaborated with team members to facilitate code reviews, ensuring compliance with coding standards.
- Employed Git for version control, ensuring traceability and manageability of code changes.
- Collaborated seamlessly with team members, actively participating in Agile Scrum processes for efficient project development.
- Contributed to code reviews, testing, and debugging processes, fostering a dynamic and collaborative development environment.
- Implemented custom exception handling Spring Boot's exception handling mechanisms ensuring graceful handling of errors and improving the overall robustness of the application.
