Ankita Chaudhary

• +91 9459622104 • chaudharyankita6@gmail.com

Highly skilled and motivated **Frontend Developer** with 5.5 years of experience in creating visually appealing and user-friendly web applications and a basic understanding of backend technologies such as Java and Springboot. Proficient in utilizing cutting-edge frontend technologies, including HTML, CSS, JavaScript, and frontend framework Angular . Possesses a strong understanding of responsive design principles and mobile-first development. Experienced in developing and consuming RESTful APIs to build seamless web applications. Proven track record of delivering high-quality code and meeting project deadlines in fast-paced environments. Completed AWS Developer Associate Certification.

Experience

2021 - PRESENT
Accenture, FullStack Developer

Responsibilities:

- Working as a Senior Frontend Developer to provide efficient, reusable and high quality code for a responsive website. Debug and fix backend issues In springboot and java.

- Conducting unit testing using Karma and Jasmine to ensure the quality and functionality of frontend components and features. Knowledge of internationalization and translating website in different languages.

- Led the team by providing expert guidance in architectural UI design, contributing to the successful implementation of cutting-edge user interfaces for diverse projects.

- Collaborating with cross-functional teams, including product owners, designers, and backend developers, to deliver high-quality software solutions.

- Participating in Agile ceremonies such as daily stand-up meetings, sprint planning, sprint reviews, and retrospectives.

- Breaking down project requirements into user stories and estimating their effort for sprint planning. Iteratively developing and delivering features in short iterations or sprints, ensuring regular feedback and adaptation. Working closely with product owners to clarify requirements, prioritize tasks, and ensure alignment with business goals. Embracing changes and responding quickly to evolving project needs, adjusting priorities and tasks accordingly.

- Deployment of application via Jenkins Pipeline and responsible for preparing packages for production deployment.

- Taking ownership of critical production fixes and promptly resolving any issues or bugs to maintain application stability and availability. Efficient in reading CloudFront and Splunk logs.

- Utilizing Git for version control, managing code repositories, and collaborating with team members effectively.

- Participating in code reviews, providing feedback to team members, and ensuring adherence to coding standards and best practices.

SEPTEMBER 2018 – MARCH 2021

Cognizant Technology Solution, Frontend Developer

Responsible for migrating legacy application from AngularJS to Angular 8 and writing unit test cases in Karma to increase the code coverage from 0 to above 80%. Responsible for fixing of production bugs. Contributed to the internationalization efforts of the portal by implementing multi-language support, facilitating accessibility for diverse global audiences.

Skills

- Frontend Development: Proficient in HTML, CSS, and JavaScript, with hands-on experience in building dynamic and interactive web applications. Expertise in frontend frameworks such as Angular and React, utilizing their capabilities to create modular and scalable frontend components in agile methodology.

- AWS Cloud Services: AWS Certified Developer - Associate with understanding of cloud concepts like s3 buckets, load balancers, session managers, CloudFront and AWS cli.

- RESTful API Consumption: Experienced consuming RESTful APIs, utilizing technologies such as Java and Springboot. Proficient in designing and implementing API endpoints and integrating backend services into frontend applications.

- Backend Knowledge: Familiarity with backend technologies such as Java and Springboot. Understanding of API integrations, debugging the backend code to resolve issues. Familiarity with MySQL, Redis.

- Version Control and Collaboration: Proficient in using version control systems like Git for collaborative development. Knowledge of Jenkins pipeline for deploying application. Experience in working with crossfunctional teams, including designers and backend developers, to ensure smooth project execution .

- Problem Solving: Strong analytical and problem-solving skills to identify and resolve frontend-related issues. Resourceful in finding innovative solutions and staying updated with industry trends and best practices.

- Continuous Learning: Enthusiastic about expanding knowledge and skills in both frontend development and backend API integration. Committed to professional growth and staying updated with emerging technologies in the field.

- Knowledge of Jira, Confluence, Git, Jenkins, Splunk, Karma, Jasmine.

Education

Bachelor of Technology in Computer Science (2014-2018) from University Institute of Information Technology (Himachal Pradesh University Shimla)
