PROFESSIONAL EXPERIENCE

Project Details
Payroll	: Swesotech
Client	: MSQT, Uptime Software, Idera, Avaya
Project	: SQL Compliance Manager, Uptime, MSQT-DC
Technology	: JAVA,Selenium, Sahi, SQL Server, Wix custom installer , OATS , InstallShield, API Testing PostMan
Duration	: January 2018 to Nov 2022.

Project Details
Payroll	: Swesotech
Customer	: Telstra
Project	: Telstra
Technology	: Selenium with C#, Java Script, Sahi automation tool, Coded UI, Postman (API)
Duration	: Feb 2018 to June 2018.

Project Details
Payroll	: Beckon Delve
Client	: Becton, Dickinson (BD)
Project	: Healthcare
Technology	: C#/ JAVA, Selenium, Specflow, Appium
Duration	: Dec 2022 to Feb 2024.

ROLES & RESPONSIBILITIES

- I have working experience on implement and customize Cristal Reporting as well as custom automation report for selenium.

- I have working experience on **DevOps** since last 3 years.

- I have created OATS project from scratch and also created dashboard for **running** oats script, to view customized **report**, to view **error log**, **download summary report** with chart and graphical implemented view, from single UI without interacting the OATS open script editor.

- Worked on **Unite Project** to automate the **whole application process from scratch**. Application is based on **Hospitality**.

- Worked on **Build Automation** to automate **Jenkins** and **Bamboo** build process including Local **SVN** to **GIT**.

- Developed automation Dashboard for **Telstra sahi project** to show all running stuff and report at one place.

- Worked on SFTP to upload file over server using secure file transfer protocol as FileZilla and other third-party application works.

- Worked on **Coded UI custom report** along with scripting for **PDF** and **CDF**.

- Implemented **Selenium API** inside **CODED UI** for handling web part that can be only working on Chrome in better way.

- Created **automated installer** for downloading the file from server and feed the value in database using Wix tool.

- Created **automated application (windows services)** which can be monitor all our storage like once any new file created, deleted or modified then it will create a report about that file that makes the storage secure.

- Created **automated application (windows services)** which can monitor the url every time, i.e once a production url is down it will generate the alert and sent the mail to all the development department about production fail.

INDUSTRIAL TRAINING

Company	: Swesotech
Project Title	: Automation Live Project
Duration	: Dec 2012 to June 2015
Description/Role &Responsibilities	:Writing automation script for web/windows application using C# and java as per the project need.
Technology	: C#, JAVA, Selenium, Sql, Wix Custom Installer tool.

ACADEMIC PROJECTS

Company   : Incapp
Project Title   : Online Education Hub
Duration   : Jan 2011 to Nov 2012
Description/Role &Responsibilities   : I learn here Basic programming for C#
                                             and JAVA, Selenium.
Technology   : C#/Java, Sql, Java Script.

AWARDS AND ACHIEVEMENTS
