Recent Projects

e-Care HMS (React)

eCare is a complete hospital management systems that is developed using React JS ,Laravel and Mysql. It's a very big software that was already developed on angular but later on we developed on react from scratch. Which contains (IPD, OPD, LAB, PHARMACY).
Where my role was :
Create the complete project structure and reusable components.
Implementation of security
Implementing role based bifurcation
Assuring Code quality of other junior colleague
Build and deploy for production
Managing team and assigning task to juniors

Susani.in (React)
Admin / App

This project is developed using java node js for API part while front-end is developed on react and flutter. So my role was to create screens according to figma for application. It's a laundry plus e commerce application.
https://play.google.com/store/apps/details?id=com.laundryservice.susani&hl=en-IN
React
Multi Role and permissions,
File uploading,
Email sending,
Authentication

Cimachineary-Buy Machine&Parts (React / Flutter)
Admin / App

https://play.google.com/store/apps/details?id=com.cimachineary.users

It's cross plateform application for android and ios for e-commerce application. I have used.
Getx Firebase Location GIT etc.
