Seeking a career with a progressive organization where I can utilize my skills, abilities, and experience in an executive capacity. I aim to effectively contribute to operations in a role that best matches my expertise.

Role Summary

As a Technical Lead at Wipro Technologies, I lead a team of React developers, overseeing the design, development, and deployment of applications. My role involves managing project activities from requirement gathering and analysis to implementation and support. I ensure high-quality deliverables and drive team success by leveraging my extensive experience and technical expertise.

Skills and Experience:

- React JS, Redux, Hooks
- TypeScript, JavaScript Frameworks
- HTML5, CSS3, Bootstrap, Material UI
- Restful APIs
- React JS Architecture, Technical Architecture
- Experience in handling React JS development teams
- Client communication

Career Snapshot:

- Accomplished Technical Lead with more than 16 years of experience in developing applications for both international and domestic clients. Demonstrated expertise in managing and completing project activities, including requirement gathering and analysis, architecture design, application development, testing, implementation, and support. Proficient in client interaction, ensuring clear communication and successful project outcomes.
- Currently working as a Technical Lead, responsible for handling a team and developing applications using React JS, Hooks, Redux & Redux Toolkits, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, Material UI, and Firebase.
- Strong real-time experience in developing React JS and JavaScript-based applications (ES6+).
- Expert in React JS frameworks and concepts (such as Components, Props, State (Redux/Mobx/Flux), Router, Hooks, etc.).
- Complete understanding of DOM manipulation, HTML5, and CSS3.
- Experience with JS unit test frameworks (such as Jest, React Testing Library, and React Test Renderer).
- Good knowledge of RESTful API/GraphQL.
- Familiarity with common frontend development tools like NPM, Babel, and Webpack.
- Experience with code versioning tools like Git, CI/CD tools, and DevOps.
- Good experience working in agile scrum (Jira) teams.

Job Profile:
- Gather requirements from clients.
- Understand business requirements and translate them into technical specifications.
- Collaborate with cross-functional teams to define, design, and implement new features.
- Support site rollouts and resolve site issues as needed.
- Develop and migrate applications from other frameworks to the React framework.
- Provide insights and recommendations based on experience.
- Develop industry and product technical expertise.
- Manage tasks using Jira and GitHub.
- Lead technical teams, manage team activities, and handle client interactions.
- Conduct unit testing and increase application coverage.
- Design, develop, test, troubleshoot, and debug application issues.

Projects

Client	**Uber Technology**
Technology	**React JS, Redux, Hooks, HTML5, CSS3, JavaScript, Typescript**, Node JS
Role & Responsibilities	In my role as a Technical Lead, I manage both individual tasks and teamwork while providing support. I lead a team and have daily client calls to gather information and ensure our work aligns with the client's requirements. I receive epics from the client, create tasks for our team, and collect daily reports from the team.
Description	Uber has several applications, and I am primarily working on Uber, uTask, and uLabel. My responsibilities include designing and developing these applications, conducting unit tests, and providing support to the team.

Name	Website: **https://www.hyblockcapital.com**
Technology	**React JS, Redux, Hooks, HTML5, CSS3, JavaScript**, Node JS & Mongo dB
Role & Responsibilities	I gather information from the client and handle the planning and analysis of the project architecture. I choose the technologies for the project and create the front end using React JS, Hooks, Redux, JavaScript, HTML5, and CSS3. Initially, I was the sole person working on it. After a few days, we hired another developer for the backend to complete the project.
Description	This product is for online cryptocurrency trading, allowing users to buy and sell Bitcoin, Ethereum, and other currencies. The application displays all trending data with time intervals on the front end. Users can see the entire buy and sell activity in real-time data on a graph.

Name	Website: **http://www.shantitravel.com**
Technology	**JavaScript**, **HTML5, CSS3,** SPIP, PHP, MySQL & Photoshop
Role & Responsibilities	I gather information from the client and handle the planning and analysis of the project architecture. I choose the technologies for the project and create the front end using HTML5, CSS3, and JavaScript.
Description	The website is an e-tour operator platform focused on online travel booking. It is available in multiple languages, including French, English, German, Spanish, and Italian. The purpose of the website is to showcase destination programs and generate travel inquiries.

Name	Website: **http://www.buniyad.com**
Technology	**JavaScript**, **HTML5, CSS3,** WordPress, PHP, MySQL & Photoshop
Role & Responsibilities	I gather information from the client and handle the planning and analysis of the project architecture. I choose the technologies for the project and create the front end using HTML5, CSS3, and JavaScript.
Description	This is a real estate website designed to meet various requirements such as property posting and location-based property searches. It offers features like property rate estimation, and the ability to locate properties on Google Maps and Yahoo Maps. The site includes different types of property rate calculators to help users calculate property rates. Visitors can also view recently searched properties.
