Languages	Java 8, Java 11, Java 17, Python, Unix, PL/SQL
Tools & Technologies	Eclipse, Oracle Database, Maven 3.0, Jenkins, Docker, Openshift, Kubernetes, JIRA, Appdynamics, Kibana, SonarQube, Checkmarx, IBM BPM
Repositories / Version Control	Bitbucket, Git, SVN

CERTIFICATIONS

AWS Cloud Practioner

EXPERIENCE

Mar 2019 – Present

Technical Manager
Capgemini, Pune, India

- Engaging in stories estimation in sprint planning & work on challenging user stories.
- Extensively creating complex backend (REST) API's using Java, Spring boot, JPA.
- Architected dockerisation of 14 backend and front end services of the application.
- Development of the environment based Kubernetes deployment configuration of all the microservices.
- Comprehensively delivering applications in all environments using Openshift Container platform using Kubernetes.
- Developing pipelines in Jenkins (CICD), and setting up code coverage pipeline in Sonarqube.
- Created Appdynamics configuration for all the microservices to help analyze performance of individual REST API within each and every microservice.
- Synchronizing with BA's & stakeholders, plan & propose solutions to the blockers.
- Leading team, refactoring, deployments, code reviews, interviewing and recruiting new candidates.

Achievement
- Recognized by client for prompt application development, configuration and deployment of all the microservices in the Openshift Container Platform and providing a stable application environment with no downtime.

Nov 2011 – Mar 2019

Project Lead
BNY Mellon Technologies India Pvt Ltd, Pune, India

- Developed Corporate Trust Transition Workflow application in IBM BPM and Java as a solution to manual email based work.
- Developed Email Case Management application which aimed to configure 120 email boxes in Microsoft Outlook. A listener was designed in Java which will read the incoming emails to the mailbox every 10 seconds. If an un-read email if found, it will be read and a new case is created.
- Developed Lotus Notes Remediation application with aim to retire Lotus Notes email box with automated flow in Java based application.
- Worked in Poole (UK) and Pittsburgh (USA) during deployment of the application and providing initial support to the users post application delivery. Helped providing fix to the issues identified after initial go-live period.
- All the Java based applications were developed using Microservice based architecture.
- Managing the Build and deployment using Jenkins and BXP using Docker container.
- Effectively engaged in resolving Triage and testing cycle issues before deployment.

Achievement
- Recognized for providing prompt support to the users at onsite after post production delivery.

Jan 2008 – Oct 2011

Systems Engineer
Infosys Ltd., Pune, India
- Attributed in developing Reports functionality using jasper reports, Customization of Finacle banking product Integrator API's, Developing custom menu's from the existing product menu as per the requirement of the bank as well as creating new menus, Exception handling.
- Responsibility of installations and Setup for the WAS Profile, Creation of Oracle Database, applying patches and maintaining VSS for the team.
- Participated in HLD, LLD for the enhancements, debugging & testing of the module.
